MAN CUT WIFE'S THROAT AND THEN SEVERS OWN HEAD

WOMAN'S DESIRE FOR TRIP TO CALIFORNIA ALLEGED CAUSE OF TRAGEDY

By Associated Press.

Wolfe City, Texas, Aug. 1.—Because his wife wanted to take a trip to California, Carter Crow, 41, early today cut her throat with a knife and then nearly severed his own head. Both died almost instantly.

First knowledge of the double killing was when neighbors saw Mrs. Crow, about 32 years old, run from the front door of the Crow home with blood flowing from a wound in her throat and fall into a ditch, where she died. Breaking into the house, entrances to which were locked, investigators found Crow dead.

Justice E. P. McWirter returned a verdict that Crow killed his wife and himself.

Two children, Carl, 11, and Foy, 13, survive the couple.

Miss Olivia Smith, of the Dyer ready-to-wear department, is spending her vacation with her sister in Dallas.

Miss Hattie Mae Fowler is enjoying a vacation at home.

Mrs. Reba Allen has returned to her duties at Dyer's after a two weeks vacation spent in visiting relatives in Amarillo.

VANZETTI BREAKS HUNGER STRIKE BUT SACCO REMAINS FIRM

FATE OF TWO CONVICTED RADICALS EXPECTED TO BE DECIDED THIS WEEK

By Associated Press.

Boston, Aug. 1.— Entering the week in which his fate is expected to be decided, Bartolomeo Vandetti, convicted with Nicola Sacco of murder, today appeared to have abandoned the hunger strike which both had carried on for two weeks. Vanzetti accepted milk, coffee and bread served him for breakfast at the state prison today. Yesterday he not only ate a portion of the regular meals but asked for bread for supper, which is usually omitted on Sunday nights.

Sacco this morning continued to refuse all food.

Results Rather Bad at Beaumont

By Associated Press.

Baumont, Texas, Aug. 1.— The first eleven votes cast in the constitutional amendment here today tabulated at noon give ten against the tax amendment and one in its favor. Votes were evenly divided, five for and five against the judiciary change, one not viting. The third and fourth proposals each polled four for and seven against. They are the amendments dealing with the fee system and salaries.

AIRPLANE LAUNCHED FROM DECK OF GREAT LINER EARLY MONDAY

TRANS-OCEAN FLYER DEMONSTRATES FEASIBILITY OF FLIGHTS FROM SHIPS

By Associated Press.

Teterboro, N. J., Aug. 1.—Clarence Chamberlin ended his flight from the S. S. Leviathan to Teterboro airport today at 10:51 Eastern daylight time.

The flier, who hopped off the "flying bridge" on the Leviathan at 8:14 this morning off Fire Island, first landed at Curtiss Field, L. I., because of a fog. After a short stop he took off again at 10:30.

Chamberlin climbed from the plane and handed nine packages, three letters, and a mail pouch to Joseph Kudlle, mail carrier, from the Hasbrouch Heights postoffice.

"The whole plan is entirely practical," Chamberlin said when questioned as to the practicability of regular ship plane service. "I could just as well have carried passengers. I had no trouble taking off although there was a 14-mile breeze blowing."

By Associated Press.

New York, Aug. .—The United States Lines reported at 10 o'clock this morning that Clarence Chamberlin had alighted at Curtiss Field after taking off from the deck of the liner Leviathan off Fire Island at 8:14. Chamberlin had intended to fly to Teterboro, N. J., but fog caused him to change his mind and land at the Long Island flying field. He announced his intention of taking the air shortly again to fly to Teterboro.

The United States Lines said that as soon as Chamberlin landed at Curtiss Field he telephoned the shipping office the report that the flight was a complete success. He said that he could have gone on to Teterboro but as there was considerable fog and as there was no necessity for running any risk he decided to come down at Curtiss.

Chamberlin reported that the take-off from the special runway on the Leviathan was even better than he had hoped for.

By Associated Press.

U. S. Destroyer Lawrence, Off Fire Island, Aug. 1.—Clarence Chamberlin hopped off from the deck of the liner Leviathan in his Fokker biplane at 8:15, daylight saving time this morning to fly to Teterboro, N. J.

Chamberlin's feat was an experiment to prove the practicability of combining steamship and airplane routes to expedite mail service and to some extent passenger travel.

The Leviathan which sailed shortly after midnight, was accompanied to sea by the destroyers Lawrence and Humphries, which were scheduled to steam at full speed in Chamberlin's wake toward shore to offer speedy assistance if there should be an accident.

The plan for the Leviathan and eventually other ships of the United States Lines to employ airplanes was evolved by Commodore Hartley of the liner and Chamberlin when Chamberlin recently returned from Europe on the Leviathan after flying to Germany with Charles A. Levine.

Although the auxiliary airplane service to be inaugurated by the United States Lines will eventually accommodate passengers who are in particular haste, it is intended primarily to expedite the mails.

It is estimated that as much as 48 hours may be cut from the present steaming time, thus reducing the trans-Atlantic passage to three days instead of five. Chamberlin carried no passengers in his test flight today.

PAVING CONTRACT AT STATE HOME IS AWARDED M'ELWRATH

F. P. McElwrath has the contract to pave the entrance driveway to the State Home as well as paving the driveways in front of several of the buildings at the institution, the work to start as soon as material which has been ordered arrives. Expenditure for the work will amount to $15,000 or $20,000, it was stated by Donald McDonald, superintendent of the Home.

Other improvements have been made at the Home during the summer which included the installation of gas. Laying of sewer pipes to connect the city system has been completed and the connection will be made in a few days. The water lines of the home have already been connected with the Corsicana mains. Work of completion of a hot water system at the Home will also be finished in a few days.

Remodeling of the buildings and other construction work for which the legislature has appropirated money will start sometime after September 1, it has been announced. The appropriations for the work will not be available before that time.

"Corsicana Has It."

LIGHT VOTE IS EXPECTED ON FOUR AMENDMENTS TODAY

LITTLE ENTHUSIASM HAS BEEN AROUSED BY ADVOCATES OF CHANGES

By Associated Press.

Dallas, Texas, Aug. 1.—Texas voters today had a chance to raise the salary of their next governor from $4,000 to $10,000 a year.

Throughout the State ballots were being cast on four proposed constitutional amendments, one of which provides a raise in salary for the executive.

A light vote was forecast as very little enthusiasm has been aroused among the masses of the voters.

The four amendments propose changes in the taxing system and the Supreme and Appellate Courts, abolish the fee system for county law enforcement officers, placing them on a salary basis, and authorizes the legislature to fix salaries of State officers and members of the legislature, except the governor, whose salary is placed at $10,000.

One amendment would enlarge the Supreme Court from its present membership of three to nine judges and abolish the Commission of Appeals which now aids the high court. It also would increase the Court of Criminal Appeals from three to five members and abolish the Commission of Appeals which has been aiding the criminal branch to clear its docket.

CALEB M. MOSS SEVERS CONNECTION WITH LOCAL SCOUTS

After having been local Boy Scout Executive for exactly three years, Caleb M. Moss has severed his connection with the Corsicana and Navarro County Scout movement and will, in all probability return to Dallas, from which city he came to Corsicana at the inception of the Boy Scout movement three years ago, although his plans have not yet been sufficiently matured to make a definite statement as to his future line of work. Mr. Moss has done a good work with the boys in Corsicana and Navarro county and his many friends in and out of this line of work here will regret his leaving and their best wishes wishes will follow him whereever he decides to locate.

It was stated that the Boy Scout work in Corsicana and Navarro County will be cared for by a regional Scout representative, who will devote only a part of his time to the work here. However, Mr. Moss stated he was not as yet fully informed as to the plans of the local and regional council on this point.

The Boy Scout movement has been carried on in Corsicana for several years, and the situation reached a point three years ago where it was found necessary to secure a full time local Scout executive and Mr. Moss was secured for the position. It was soon evident that those who had the choosing of an executive in hand had made a wise choice, for during the three years that Caleb M. Moss has been in charge of the work here he has had the interests of the boys at heart every minute of his time and has builded here a Boy Scout organization second to none in a city of this size in the country. He has endeared himself to every boy in the town and in many sections of Navarro county, whether they were Scouts or not, and many little fellows are only awaiting the time when they come to the Scout age to enter the ranks of that organization, all through the friendly offices of Mr. Moss during his three years' untiring work among the boys of Corsicana and Navarro county.

Wherever Mr. Moss decides to cast his lot the best wishes of a host of boys and older folk of this city and county will go with him. As above stated, Mr. Moss said he had not as yet made a decision as to his future line of work, but that he had a very interesting offer from a large Dallas concern that he might accept.

In conversation with a Sun reporter Monday morning, Mr. Moss stated that he desired to acknowledge his indebtedness to many Corsicana people for their kindness to him and his family during the time he has been in charge of the Boy Scout work here and that he would ever have a tender spot in his heart for Corsicana and Corsicana and Navarro county people. He asked that his thanks and appreciation be conveyed to those who have befriended him and aided him in his work for the making of better boys and therefore better men of the future in this section of Texas.

Mr. and Mrs. W. P. Moore, daughter Miss Marzee Moore, and son, Buster Moore, all of Hubbard, visited Mr. and Mrs. Paul Moore Sunday.

Mrs. E. C. Huckabee has returned from a two weeks visit with her mother in McGregor.

OKLAHOMA CONVICTS STAGE WOOD ALCOHOL PARTY; THREE DEAD, TWO DYING, 7 BLIND

By The Associated Press.

McAlester, Okla., Aug. 1.—A small amount of wood alcohol, taken late Saturday from the prison work shop, today had resulted in the deaths of four convicts and the serious illness of eight others in the state penitentiary here.

Early yesterday morning guards heard cries of distress from a cell and upon investigation found two men apparently dying. Additional cases of illness soon were discovered.

The dead are:

EUGENE WADE, Oklahoma City.

ROBERT BARNETT, Craig County.

J. D. WILLIAMS, Seminole.

JOE WILSON, Seminole.

Henry Richardson of Ottawa was not expected to recover and prison physicians feared that total blindness would result in other cases.

After hours of questioning, convicts today said that the poison liquor had been taken from the prison work shop. A check of the stock revealed only a small amount of the liquid missing.

By Associated Press.

McAlester, Okla., Aug. 1.—After staging a party with a small can of wood alcohol within the walls of the Oklahoma State penitentiary three convicts were dead here today, two others were believed to be in a dying condition and seven more seriously ill at the prison hospital.

All the participants of the party who survive will be blinded as a result of drinking the poison, it was said by Dr. J. W. Echols, prison physician.

Robert Barnett, J. D. Williams and Joe Wilson are the convicts who are dead. Barnett was serving a 35-year highway robbery sentence and the other two were under short sentences.

Dr. J. Q. Newell, warden, said that none of the men would give any information as to where they obtained the wood alcohol. However, he expressed the belief that while working in the paint shop Saturday afternoon one of the men had dipped a small vessel into the can of wood alcohol, later hiding it out.

They then, the warden believes, took the can of liquid into the prison yard after working hours and passed it around to their pals.

BUILDING PERMITS DURING MONTH JULY REACHED $86,925

The city engineer's department issued eight permits for a total of $86,925 during the month of July, according to figures released Monday.

To be Free From Worry

is one of the most necessary attributes of a real vacation.

Your valuable papers, silver and jewelry will be beyond the reach of thieves or fire in our vaults.

Let us free your mind of the worry that something may happen to them while you're away.

A safe deposit box is a good place to keep valuables even when you're at home.

State National Bank

See the Totals Grow!

The truest criterion of your financial condition is the question, "Are Your Savings Increasing?" A man whose deposits continually exceed his withdrawals cannot "go broke". Deposit regularly and SEE THE TOTALS GROW.

UNIFORM TRAFFIC RULES.

Absolute uniformity in methods of traffic control is an ideal worth striving for but impossible of complete realization. There are local conditions to be met which will require the special adaptation of the rules; but this is far from being a reason for rejecting the nation-wide movement for uniformity sponsored by Secretary Hoover. In its 1927 motor act the Pennsylvania Legislature followed the main lines of the Hoover plan; and when this goes into effect at the beginning of the coming year, Pennsylvania will be in line with many other states which have agreed to co-operate in the effort to devise and enforce model traffic rules.

A conference of representatives from most of the large cities of the country meeting in Detroit has tried to bring about a solution for this problem of daily growing complexity. Variations in rules and lights are now almost as great as the number of communities making use of them, and only the most careful and observant driver can hope to escape mistakes or the infraction of local regulations. Pennsylvania's law lays down many definite rules concerning speed, the course to be followed at crossings and in other emergencies, and in passing. These, however, will be of little avail if they are not obeyed and really enforced. Traffic officers cannot cover every road and street. The earnest co-operation of motor drivers and auto owners is essential if reasonable and safe control of traffic is ever to be brought about.

ARE SCHOOLS TOO BIG

An interesting issue is raised by a committee of the American Institute of Architects which is likely to be sharply challenged by boards of education and perhaps, too, by many educators. This is whether the modern school building is not too big for entire efficiency and whether it is true that what is gained in economy of management and upkeep is not lost in a noticeable slump in the quality of the product.

Every city has many striking examples of the modern trend in public school designing, and the tendency is toward larger and still larger buildings, especially for the junior and senior high schools, and even in some cases for the elementary grade buildings. So far as the high schools are concerned, their enormous increase in size in recent years has been a natural reaction to the effort to lengthen the average school life of the pupil.

It is doubtless easier to meet this pressing need for greater and still greater capacity in school buildings by erecting larger and still larger structures. The cost of the sites, for one thing, is an important factor which the business department of the system must take into account, and the size of classes is another about which the pedagogues must decide. Meanwhile, the architects are to continue their study in behalf of the teachers who are represented as protesting against "the modern drift toward Jumbomania," which tends to nullify all their efforts.

THE TEACHER IS TARDY

About the time a man becomes old enough to understand that the way of the transgressor is really hard, and no joking, he finds that he is so old that nobody is even interested in his transgressions. So far as society is concerned he may keep right on transgressing if he is having any fun out of it. All of which is very humiliating to one who in youth and middle age has considered himself equally good in a 100-yard dash or a mile run.

People, he has found, feel perfectly safe to poke a dead snake.

Experience, of course, is the best teacher, but she begins her instructions so late in life that they are out of date before they can be put into practice, and then they are about as happy as the undertaker's stale joke with which he attempts to cheer up the family of the late lamented.

In youth we pay no attention to precepts, and in old age, when we are perfectly willing to heed them if they will cure our rheumatism, pay the grocer or get us back the money we've gambled away, we find that like the flowers which bloom in the spring, they have nothing to do with the case.

WILD LIFE LOSS DISTRESSING

While the loss of wild animal life may seem unimportant in comparison with the appalling property loss from the recent disastrous floods in the Mississippi valley, yet it is one of the distressing features of this unparalleled calamity, as shown by the American Game Protective Association investigation.

All floods destroy ground dwelling game and fur bearing animals, nest and young of ground nesting birds, and even many of the birds themselves, and the recent floods having devastated such a tremendous area, their loss has probably been the greatest in the history of the country.

While no accurate statement can be made as yet, and the extent of such losses will not be apparent until some time to come, yet enough is shown to be able to say that in many wide areas all such wild life has been practically wiped out. It is estimated by agents of the United States Bureau of Biological Survey that at least fifty per cent of the small game animals in the flooded districts have been killed.

The flood came at a particularly unfortunate time so far as animal life is concerned, because the young of most species were just the young sucking age too small to save themselves from drowning, and the same can be said of young birds, such as wild turkey, quail, grouse and innumerable species of song and insectivorous birds which nest on or near the ground.

Even those species of animals which live in the water or in swampy areas have suffered with the rest. The muskrat industry of Louisiana is estimated to yield a revenue of $6,000,000 a year, and strenuous efforts were made by the conservation department in the state to save as many muskrats as possible by building rafts covered wit hay or straw, and setting them afloat, on which the animals might take refuge. Food was placed on these rafts to that the muskrats resorting to them might survive for a considerable length of time.

It is believed that many deer have been lost, though probably a great proportion of them would escape by resorting to higher lands.

Raccoon and opossum being adept at tree climbing, undoubtedly saved themsleves in most instances.

The loss of quail and wild turkeys is particularly unfortunate, as these two species of valuable game birds are at a rather low ebb anyway, and many years of care and protection will undoubtedly be necessary to bring them back to reasonable abundance.

The game and conservation departments of the several states affected, and the United States Government Bureaus are engaged in making careful surveys, and more definite information will be available soon.

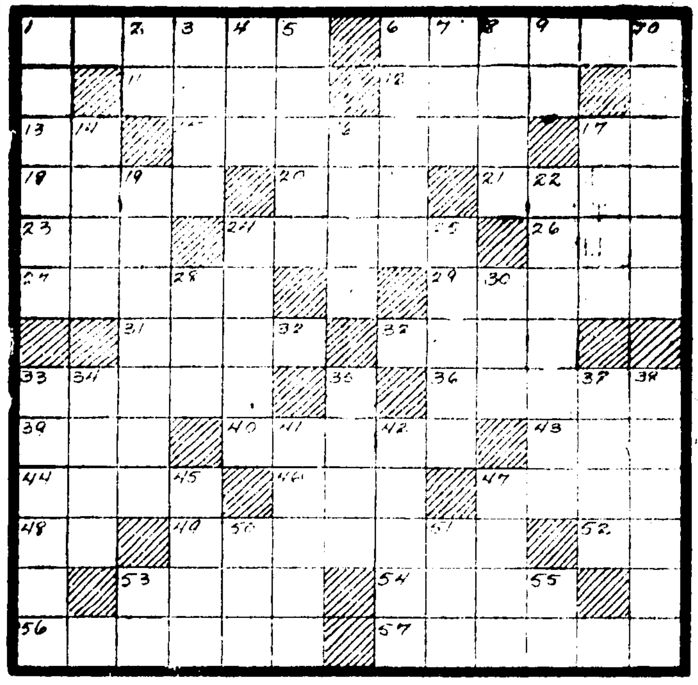
Three additional elementary boarding schools, for instruction of youth in rural sections of Mexico, will be established this year in the states of Puebla, Chihuahua, and Mexico. Education is the only salvation for the Mexican people. It may take a hundred years but if the proper educational program is successfully carried out a happy and prosperous nation with a sound and secure government will be the result. Mexico is a rich country but these rich resources will be of no value until there is an educated native population.

Probably no one else can look any hotter in July than a motorist manipulating a demountable rim tool by the roadside, unless it is the ice man's new helper.

While it has been a backward summer in the main there have been days when one yearns to be an Airedale long enough to crawl under the porch.

The present paving program will soon be completed and when it is Corsicana will be one of the best paved cities of similar population in the state.

Today's Cross-Word Puzzle



HORIZONTAL.

1—a musical instrument
6—to banish
11—a sanctuary
12—behind
13—a preposition
15—something unknown
17—personal pronoun
18—without a doubt
20—a period of time
21—shortly
23—a beverage
24—to apply the mind with a view to learn
26—a kitchen utensil
27—glide along
29—one and all
31—to plunge head foremost
32—equitable
33—a subject of discourse
36—harvests
39—battle
40—a citizen of Rome
43—to fasten
44—besides
46—encountered
47—what we stand on

BELIEVED DEATH OF W. L. STALLINGS WAS DUE TO ACCIDENT

By Associated Press.

Houston, Texas, July 30. William L. Stallings, 58, manager of the Agricultural Department of the Chamber of Commerce, was shot and killed, apparently accidentally, and R. Q. Wells, police officer was believed to be dying in a hospital from injuries received in answering a call to the Stallings home early Saturday.

Police received a call that there was a "shooting" at 2008 Arbor street, which is Stallings address. Officers Wells and M. A. Grasham were sent to the scene.

At Elgin and LaBranch streets, which is a "blind corner" an ice truck drove out in front of the police car. Gresham, who was driving, tried to pass in front of the truck, saw he could not make it and attempted to swing behind the machine.

A front fender on the police car hit a rear wheel of the truck and the police car turned over several times. Wells was injured internally and may not live, it was stated at the hospital.

Stallings was found lying on the wood pile near his garage, his chest torn open by a discharge from a double barrel shot gun. The gun was under his body.

Believed Foot Slipped.

The police theory is the Stalling's foot slipped in the wet dirt and that he gun was discharged as he fell.

Members of the family said Stallings arose at about his usual time and went into the yard to shoot rats about the wood pile. They found his body when he failed to return to the house for breakfast.

Stallings was born in Tennessee and moved to Groveton, Texas, in 1909, moving to Houston a year later. Stallings had been connected with the Agriculture Department of the Chamber of Commerce eleven years until he resigned on June 1.

Justice of the Peace B. M. Ray returned a verdict of accidental death. Stallings is survived by his wife, two daughters, Mrs. Godbold and Mrs. R. B. McElroy of Houston; a sister, Mrs. L. B. Matthews; a brother, Slade Stallings, both of Humble, and two grand children.

FORD PERSONALLY TESTING NEW CAR AT DETROIT PLANT

By Associated Press.

Detroit, Mich., July 30. Motor and speed test of the new automobile shortly to be introduced on the market by the Ford Motor Company are being made here personally by Henry Ford it was announced today.

Ford, who celebrated his 64th birthday quietly at home today, indicated he had completely recovered from injuries received in a recent accident.

LITTLE CHILD WAS BADLY BURNED EARLY MONDAY RURAL SHADE

Special to the Sun.

Kerens, Texas, July 29.—The little 13 months old child of Mr. and Mrs. F. F. Johnson of Rural Shade was badly burned about the chest and abdomen early Monday morning when it pulled at the table cloth while eating breakfast, overturning a cup of hot coffee. The baby was rushed immediately to Kerens where medical attention was given. The last report received from the parents say that the infant is resting easy, and apparently out of danger, although a burn on the chest is considered serious account of subjecting itself to pneumonia.

The Johnson family moved to Rural Shade, south of Kerens, from Trinidad.

AN EXHILARATING EFFECT

A bottle of Herbine on the shelf at homes is like having a doctor in the house all the time. It gives instant relief when the digestion gets out of order or the bowels fail to act. One or two doses is all that is necessary to start things moving and restore that fine feeling of exhilaration and buoyancy of spirits which belongs only to perfect health. Price 60c. Sold by Lee Drug Company.

FINE COTTON AND CORN DISPLAYED AT KERENS THIS WEEK

Special to the Sun.

Kerens, Texas, July 29. Three ears of good corn of the Yellow Dent variety, about twelve inches long and well proportioned, are now on display at the Kerens National Bank along with a stalk of cotton which is well fruited. The corn apparently will shell a bushel to seventy ears. It was grown by Wallace Holland, colored, on his farm 1 mile south of Kerens. The cotton stalk bears about 100 good sized bolls, squares and seven blooms, and it is of the size best required for good cotton. This was raised on the Coleman land in Elm Flat by Floyd Graves.

TWO CARS WHEAT SHIPPED PAST WEEK OUT OF DAWSON

Dawson, Texas, July 29. R. J. Anderson shipped a couple of cars of wheat last week which were grown in the Dawson territory. The wheat this year did not produce as well as expected, neither did oats, due to rust.

Lloyd Watkins of Union City, Tenn., is visiting in Corsicana.

Farmers Want Column

Rates—One cent a word for each insertion. Count your words, send ad to this office, giving number of times you want it to run, together with check or money order to cover cost. No ad taken for less than 25 cents. Cash much accompany each ad.

TAKEN UP—One brown mare mule, about 15 hands high and 10 years old. Small collar marks on neck. No brands. On the J. J. Derden farm, Southeast of Corsicana.

FOR SALE—Essex 4 in good condition, will trade for live stock; horses, mules or cows. See A. Dowd at 423 North Beaton street. Phone 560.

FOR SALE—At a sacrifice, a 55 barrel galvanized cistern in good condition. Apply 1224 West 4th Ave., or phone 1425.

TAKEN UP—Bay mare mule, late Saturday, July 22nd, 14 1-2 hands high, 12 years old, had trace chain on foot. [illegible] see Horace Wood on the Derden farm five miles southeast of Corsicana on Corsicana-Kerens road, mail address, Route 5 Corsicana.

FOR SALE—Big bone Poland China pigs at Monroe Woodard, Jester, Texas.

FOR SALE—Three highly bred Shropshire ram lambs, ready for service. Chris L. Knox, at Central State Bank.

LOST—Two truck keys wired together, No. 42 on keys. Finder return to Daily Sun office, Corsicana, and receive reward.

DAY OLD Rouse Single Comb Brown Leghorn Baby Chicks for sale $10 per hundred at home or $12.50 delivered. Can fill order March 25. J. G. Melton, Blooming Grove, Texas, Rt. 1.

OATS SOAR TODAY WINNIPEG EXCHANGE TRADING IS WILD

By Associated Press.

Winnipeg, Man., July 30. July oats soared 18 1-4 cents today in one of the wildest trading sessions experienced on the Winnipeg grain exchange in many years.

Trapped short interests fought to cover up their commitments, but with strong interests in control of the cash months supplies, the price was forced up so rapidly that difficulty was encounterd in following the advance.

From the opening price of 69 3-4, July oats sky rocketed by leaps and bounds and at the close the top price of 88 cents was recorded. Other months were comparatively dull.

July wheat also scored a substantial gain, the closing price being around 3 7-8c above Friday's final quotations.

PRINCE OF WALES, PRINCE GEORGE AND BALDWIN WELCOMED

By Associated Press.

Quebec, July 30.—The Prince of Wales, Prince George and Premier Baldwin, visiting Canada to take part in the diamond jubilee confederation celebrations, were officially welcomed to Canada shortly after 10:30 o'clock this morning, being given an enthusiastic reception.

The party was first greeted by Prime Minister MacKenzie King, who went aboard the Empress of Australia which came into the harbor shortly after midnight. The Premier accompanied the Royal Princes and the Premier to King's wharf where the official reception was held.

The Prince of Wales wore the uniform of the Seaforth Highlanders, while Prince George wore that of a naval officer.

Weather is Ideal.

Brilliant mid-summer weather greeted the visitors, the Prince of Wales, Prince George and Premier Baldwin were welcomed by Premier King and Lieutenant Governor Perodeau on the Empress of Australia about one hour after she anchored in mid-stream and both parties came on board the Lady Grey while the guns boomed from the citadel. Thousands of persons flocked into the narrow streets of the lower town and thousands more lined Dufferin Terrace from end to end.

His Royal Higness inspected the guard of honor supplied by the Royal 22nd Regiment and stepped under the canopy erected on the wharf where members of the Federal cabinet, the Provincial cabinet and the city officials were presented to him, Prince George and Premier Baldwin.

After the formal reception on King's wharf, the two Princes were driven off for Spencer Wood in an open car, accompanied by a mounted escort of Royal Canadian Dragoons in scarlet and gold.

Premier King and Premier Baldwin followed in an open car. As the party moved off rounds of cheers went up for the visitors. Other cars, thirty in all, bore the officials and other members of the parties to the Chateau where the Province of Quebec is entertaining the guests.

Welcomed By Mayor.

In English and in French, the mayor of Quebec welcomed first the Princes and then Mr. Baldwin. In part the mayor said:

"We greet in your Royal Highness, the Ambassador of Peace, whose long and indefatigable journeys through the different dominions of the commonwealth have so much contributed to strengthen the bonds which link together the nations of the British Empire.

"We also extend to His Royal Highness, Prince George, the best wishes of our hearts in this extensive voyage which will mark as an eventful period of his life. We shall keep a fond remembrance of this charming prince.

The annual loss from destruction and damage by moths amounted to hundreds of millions of dollars. Yet it is so easy to prevent such loss. Fly-Tox kills the moth, the eggs and the larva. Insist on Fly-Tox. Fly-Tox is the scientific insecticide developed at Mellon Institute of Industrial Research by Rex Fellowship. Simple instructions on each bottle (blue label) for killing ALL household insects. Fly-Tox is safe, stainless, fragrant, sure. Every bottle guaranteed.

GORGEOUS BONNET OF FEATHERS, BEADS MADE FOR COOLIDGE

By Associated Press

Rapid City, S. D., July 30.—A war bonnet gorgeous with feathers, beads and strands of colored lamb's wool is the crown to be placed upon President Coolidge at Deadwood next week when he becomes a chief of the Sioux Indians.

The head piece for the ceremony of making a president a chieftan is ready, but other details of the Deadwood initiation are shrouded in secrecy. Many conferences are being held by the score of Sioux Chiefs who will take part. There is considerable dismay because the name to be conferred upon Mr. Coolidge has leaked out and there are good indications that the name originally chosen at the campfire meeting in the moonlight—Chief Leading Eagle—will be abandoned and another selected.

FALLING WALL OF BURNING BUILDING FATAL TO FIREMEN

By Associated Press.

Atlanta, Ga., July 30. Two firemen were killed and two are known to have been injured seriously by the collapse of a wall during a fire today at the W. L. Fain Grain Company not far from the Atlanta Terminal station here.

Eight other firemen fighting the flames from the roof of a nearby building escaped when the wall of the structure collapsed.

Barney Richardson, one of the dead, was buried under the wreckage. Clyde Cawthorne, captain of fire company number five, was the other firman killed.

E. A. Jorden of Waco was in Corsicana Friday.

POULTRY BODY HAS BROUGHT INCREASED PRICES TO RAISERS

Special to the Sun.

College Station, Texas, July 29. "The operation of the Southwestern Poultry Association has resulted in better prices being paid for poultry and poultry products to all producers who sell in Brownwood. Better facilities for refrigeration and handling have been provided, and poultry production has been greatly stimulated," said O. P. Griffin, county agent, Brownwood, in a discussion of the Southwestern Poultry Association before the poultry group at the Farmers' Short Course, A. & M. College of Texas.

"As an educational agency, co-operative marketing has helped put over methods of production and handling eggs. More than half of all eggs brought to market in Brownwood in summer are infertile. Before the organization of the co-operative marketing plan only a very small per cent were infertile and large numbers of eggs were candled out, causing heavy loss to the producer.

"Co-operative marketing helps in several ways to raise the price level. It makes competition in buying and makes handlers of poultry and poultry products more alert to find the best outlet. The association member has access to markets other than his home town. Then too, the co-operative by grading and selling a superior product, finds a ready market at good prices.

"With reference to whether it will pay to attempt organization for marketing the following things should be considered. Flocks of less than 100 chickens are not worth anything to an association. A greater degree of success can be had with a large production within a small area. In order to have a high grade product to market, eggs should be delivered at least twice a week, every day would be better.

"An Association can make a better showing with turkeys than with either eggs or chickens. And last and most important of all, there must be volume enough coming from people who really want to co-operate to pay the overhead expense without taxing the product too much."

ONLY MIRACLE CAN PREVENT BREAKUP OF NAVAL PARLEY AT EARLY DATE WITHOUT ACTION

By Associated Press.

Geneva, Aug. 1.— That nothing short of a miracle can prevent a breakup of the three powered naval reduction conference before the week ends, either by a quiet agreement among the delegates to separate or a show down in the plenary session called for Wednesday or Thursday, was the general impression prevailing in Geneva today.

The fact that the plenary session called for today, was postponed to Wednesday or Thursday was looked upon by commentators as a victory for the 'treaty at any price" party, which has adherents in all three delegations, but the postponement was not at all to the liking of the experts of the British and American delegations, who are said to realize that there can be no reconciling of the British and American viewpoints and to feel that nothing can be gained by the delay.

The Japanese, thanks to whose mediation it appears the breathing spell of two or three days was obtained, seem satisfied. They feel that nothing should be left undone, because in their opinion if Great Britain and the United States separate without an accord of limitation, if the latter particularly, starts a big building program, Japan would be hard put to follow suit.

British Ambassador Confers With Kellogg

By Associated Press.

Washington, Aug. 1.—Sir Esme Howard, the British Ambassador, returned to Washington from the summer embassy today on an unheralded visit and was in private conference with Secretary Kellogg at the State Department for more than half an hour. Washington officials would not indicate that significance was attached to the ambassador's visit or that it might deal with the situation at Geneva.

Lloyd George Says Geneva Meet Farce

By Associated Press.

Cambridge, England, Aug. 1.—The Geneva conference has been conducted to an inevitable fiasco, declared former Premier Lloyd George, speaking at the liberal summer school here today. He said he hardly cared to dwell on the possible effects of failure of Great Britain to come to terms with the United States on a ship building be the beginning of rivalry which would alienate the two great nations "on whose good will and cooperation the peace of the world depends."

Mr. Lloyd George attacked the Baldwin government, asserting that Geneva gave another example of its misshandling of the nation's affairs.

President Watches Naval Conference

By Associated Press.

Rapid City, S. D., Aug. 1.—A close ear to developments at the Geneva naval armament conference was given today by President Coolidge as he watched the day's happenings apprehensively.

Troubled by the turn of affairs taken at this parley which he had so hopefully convened more than a month ago, the President has taken an active hand in the last few days, although still behind the scenes. Over the week-end, Mr. Coolidge had kept in closest touch with the program across the sea by communication with Washington.

Today also brought the President an opportunity to learn of farm conditions and prospects in a conference engagement with Senator Capper, Republican, of Kansas, who was recognized as leader of the erstwhile farm bloc.

NINETEEN WHITE CONVICTS ESCAPE FROM PRISON FARM

By Associated Press.

Houston, Texas, Aug. 1.—Seven of nineteen white convicts who escaped from the Imperial State Prison Farm near Sugarland, 25 miles from Houston, at 8:30 p. m. Sunday, had been recaptured early Monday, it was stated at the farm.

The prisoners cut their way through the barracks floor.

The recaptured men were: Robert Smith, Bexar, burglary and theft; Joe Roberts, Wilbarger, burglary; J. C. Fowlett, Bexar, Bexar, burglary; Roma Hammons, Van Zandt, forgery; Floyd Tidwell Hunt, forgery, and two others whose names are not yet known to prison authorities.

Those retaken and returned to the farm were captured within a radius of six miles of the farm.

G. E. Moore of Frost was a business visitor in Corsicana Monday.

SENSATIONS SPRUNG IN LOUISIANA CASE AT FRANKLIN TODAY

JAMES BEADLE ALLEGED TO HAVE MADE CONFESSION TO SHERIFF PECOT

By Associated Press

Franklin, La., Aug. 1. — James Beadle, one of three defendants in the Lebouef murder trial today made a confession to Sheriff Charles Pecot, the sheriff announced.

Sheriff Pecot said Beadle admitted being present when James J. Lebouef was alleged to have been slain. The sheriff declined to give any more details, explaining they would be related when he took the witness stand.

Announcement of Beadle's confession followed a request by him in open court for separate counsel to represent him.

Both Mrs. Lebouef and Dr. Dreher are alleged to have made statements accusing Beadle of firing the two shots which ended Lebouef's life.

Mr. Himel, after a conference with Beadle, declined to give newspaper men any additional information.

"It will come out in court," he said.

After a recess to permit Mr. Himel to confer with Beadle the jury was brought into the court room and promptly taken out again when the prosecution began to introduce testimony intended to prove that a confession alleged to have been made by Mrs. Lebouef should be admitted as evidence. The defense is vigorously opposing introduction of the confession.

Stenographer Testifies

H. G. Allen, stenographer, the first witness, testified he took a statement made by Mrs. Lebouef which said she saw her husband shot but could not identify two men she stated were in a boat from which the shots were fired.

The witness said no promises or threats were made to Mrs. Lebouef before she made the statement.

"Mrs. Lebouef was told that anything she said would be used against her," it was testified.

After Mr. Allen completed his testimony District Attorney Emile Vuillemot, asked that Mrs. Lebouef's written confession be admitted as evidence.

The defense called Walter T. Gilmore, assistant district attorney, who said he had taken no part in the prosecution of the case.

The witness testified he was present on one occasion when Sheriff Pecot questioned Mrs. Lebouef and that she made no admissions while he was present.

Questioning Friendly

The witness said the questioning of Mrs. Lebouef was done in a "very friendly manner," the woman, he said, seemed worried.

Mr. Parkerson objected to admitting the confession on the grounds that Mrs. Lebouef had been advised to turn states' evidence and that Louis R. Blakeman, Morgan City, chief of police and brother-in-law of the woman, had told her if she would turn states' evidence he "would do all he could for her legally."

He maintained also that Mrs. Lebouef was led to believe that Sheriff Pecot was her friend in advising her to confess.

The defense then began to quote a great deal of law to support their contentions. This was continued until the lunch recess.

At the beginning of the afternoon session defense attorneys resumed their efforts to exclude Mrs. Lebouef's statement from the jury.

Trapper Asks For Separate Attorney

By Associated Press.

Franklin, La., Aug. 1.—A sensation was sprung in the Lebouef mured trial today when James Beadle, one of three defendants, arose in court and requested Judge James D. Simon to appoint an attorney to represent him.

Previously James R. Parkerson, L. O. Pecot and R. F. Walker had represented Beadle, Dr. Thomas E. Dreher and Mrs. Ada Bonner Lebouef, the three defendants charged with murdering James J. Lebouef, husband of the accused women.

When court was convened this morning the request for separate counsel was the first order of business.

Judge Simon told Beadle he understood he wanted a lawyer to represent him alone.

"I do," said Beadle

"Do you have any money to pay an attorney?" the court asked.

"No sir, I have no money," was the reply.

The court then appointed Rene H. Himel, former district attorney of St. Mary parish, as counsel for Beadle.

James R. Parkerson, chief defense counsel, said he had heard nothing of Beadle's desire for separate counsel, but registered no objection, although he represented Beadle during the first week of the trial which began last Monday.

Alleged Interview Of Mrs. Lebouef

By Associated Press.

New Orleans, Aug. 1.—The New Orleans States today published an interview with Mrs. Ada Bonner Lebouef in which she is quoted as saying that her husband, James J. Lebouef, was killed after he first had fired upon Dr. Thomas E. Dreher when the two met by appointment to discuss in friendly fashion the gossip which had linked the names of Mrs. Lebouef and Dr. Dreher.

Mrs. Lebouef was quoted as saying "Dr. Dreher didn't shoot Jim Lebouef," although the interview does not directly charge the killing to Beadle, who the State claims was induced by Dreher and Mrs. Lebouef to shoot Lebouef.

Beadle and Lebouef, she said, had become to embittered over a quarrel of seven years' standing that they had not spoken.

She was silent when asked it Beadle had shot her husband.

The meeting occurred by appointment on the flood waters outside Morgan City, near the edge of Lake Lapourde, the story relates, and the widow is quoted as saying she recognized both Dr. Dreher and James Beadle. Her husband, who she was quoted as saying had been insanely jealous for two years, cursed the physician as they met to open the friendly discussion, the newspaper says, and opened fire on Dr. Dreher.

Three reporters were present at the interview, the States says, and it was given shortly after daybreak today in the jail.

MID-WEST FARMERS STILL HOLD HOPE IN M'NARY-HAUGEN BILL

By The Associated Press.

Rapid City, S. D., Aug. 1.—Farmers are clinging to the McNary-Haugen relief bill pending the presentation of an adequate substitute. Senator Capper, Republican, Kansas, leader of the ersawhile "farm bloc", reported upon his arrival here today for a conference with Presiednt Coolidge.

Moreover, Senator Capper gave notice that the supporters of the McNary-Haugen bill, which was vetoed last session, were preparing to carry on the fight next session for the essential details of this measure.

Correction.

The article in the Daily Sun Saturday which told of the burning of the home of Mrs. Ada Story at Powell the amount of loss should have been $3,000 instead of $1,500.

Robert and Herbert Cooksey left Sunday for a two weeks automobile tour of Old Mexico.

CANADIAN RIVER BRIDGE AT TASCOSA EXPECTED GIVE WAY

HEAVY RAINS FELL IN DISTRICT NORTH OF TEXLINE SUNDAY

By Associated Press.

Wichita Falls, Texas, Aug. 1.—Train service into Wichita Falls on the Fort Worth and Denver railroad was impaired Sunday as the result of washouts on the Colorado and Southern Line, which runs north from Texline to Denver, and officials of the road Monday said that high waters in the Canadian river at Tascosa may take out the bridge over that stream.

Reports of washouts on the Colorado and Southern tracks, which the Fort Worth and Denver uses after leaving Texline, indicated that a heavy rain fell in that section Sunday.

Officials of the Fort Worth and Denver reported Monday that a light rain fell during the night at Texline and that a heavy rain was reported in the vicinity of Claud and Goodnight. A report of hail several feet deep in the vicinity of Des Moines, N. M., could not be confirmed by them.

Whether the bridge over the Canadian river at Tascosa goes out depends upon the rainfall in the New Mexico mountains, Denver officials said. The water in the river was reported to be very high.

At 9 o'clock Monday morning there was a steady rain falling all the way from Wichita Falls to Childress. The Wichita Falls and Southern railroad reported rain from Wichita Falls to Archer City but said no rain had been recorded at other places along its lines.

Wind Levels Many Telegraph Poles

By Associated Press.

Amarillo, Texas, Aug. 1.— A stretch of four miles between Malden and Goodnight, on the Fort Worth and Denver railroad, was swept by a windstorm last night that blew down more than half a hundred telegraph poles on the railroad's property, but otherwise did no damage.

There was an inch of rain at Clarendon, but no wind to speak of. The entire region around Amarillo was rain-soaked but no wind damage, other than between Malden and Goodnight, was reported. The rain in the Clarendon region and around Lubbock was said to be of material benefit to crops and grazing lands.

GARNER PREDICTS NO CHANGE WILL BE MADE IN TARIFF

By Associated Press.

San Antonio, Texas, Aug. 1.—Predictions that the Republican party will permit no changes in the tariff at the coming session of congress are made by Congressman John N. Garner in an article in the October number of the Argus, a monthly magazine published here.

"In the first place," the article says, "the Seventieth Congress will be controlled by the Republicans both in the house and senate, and of course there will be a Republican president, Mr. Coolidge, holding office until March 4, 1929. For this reason it is quite improbable that any tariff tax legislation will be considered—especially as a presidential election will be held in 1928, and the Republican party would not want to hazard its chances on a new tariff bill.

"If I had my way, with the little knowledge I now have of each schedule, I would materially increase the tariff on agricultural products, especially those of the vegetable variety. In our immediate territory tomatoes, onions and cabbage should have very careful consideration with a view to preserving the American market for American products—and I would at the same time consider the reduction of the schedule of steel, aluminum, and other highly developed manufactured articles that are being exported in large volume.

"I would give special thought to a reduction on those products that are controlled by monopoly and those whose prices are already fixed at the maximum the public can pay."

Congressman Garner expects to be in Washington from the latter part of October until about next July.

Stop That Itching

Use Blue Star Soap to cleans the effected parts, then apply Blue Star Remedy. It penetrates the skin, kills out the germs, stops the itching at once, and restores most cases to a healthy condition. Eczema, Tetter or Cracked Hands, Poison Oak, Ringworm, Sore Blistered Feet, Sunburns, Old Shin Sores—all of these have yielded to its wonderful healing power. 60c and $1.00 a jar; Soap 25c,

M. will be held Wednesday evening August 3, at 8 o'clock and at that time a speaker representing the Committee on Masonic Service and Education will address the lodge. Also motion pictures of the various institutions will be shown. All members of the lodge are urged to be present.

COTTON CONSUMED REACHES HIGHEST FIGURES ON RECORD

NEARLY SEVENTEEN AND ONE-HALF MILLION BALES CONSUMED PAST YEAR

By The Associated Press.

New Orleans, Aug. 1. The world consumption of American cotton during the season ended with the close of July was fixed at 17,428,000 bales in the annual report of Secretary Henry G. Hester of the New Orleans Cotton Exchange today.

The world's consumption, Mr. Hester said, had never before reached seventeen million bales. Correspondingly, cotton consumption in the Southern States, including linters, was the largest ever known. Southern consumption was fixed at 5,471,391 bales, 692,456 more than was consumed last year and 1,091,273 more than the previous years.

Secretary Hester said the enormous cotton consumption was largely due to the use of relatively cheap, low grade cotton which to a considerable extent was substituted for other growths by the mills and other consuming estimates.

He added that the world had taken virtually all the American cotton it could get. Exports amounted to eleven and a quarter million bales, and the takings by American mills, North and South, totalled about eight and a quarter million bales.

The consumption, he said, had virtually absorbed the great crop of the past year, when 19,100,000 bales were produced.

The world consumption revealed by the figures was stated to be the greatest ever recorded.

SEYMOUR LOWMAN SUCCEEDS ANDREWS ENFORCEMENT CHIEF

GREATEST JOB IS TO HOLD DOWN RADICAL WETS AND DRYS, HE STATED

By Associated Press.

Washington, Aug. 1. Formally taking over the office of federal prohibition enforcement chief Seymour Lowman of New York, today declared "Our greatest job is to hold down the activities of the radical wets and the radical drys.

"Temperance and sobriety are commendable virtues" he said. "We want a sober America.'

Mr. Lowman, a former lieutenant governor of New York, was sworn in at the Treasury to succeed Lincoln C. Andrews as assistant secretary in charge of dry law operations.

'I am looking for honest, efficient enforcement of the prohibition law, just the same at other United States laws are enforced," he said. "Disloyalty will not be tolerated in the prohibition system. I have no policy except an orderly business like carying out of the mandates of congress."

Smuggling More Difficult

Assistant Secretary Andrews turned over "a splendid organization for efective work when he resigned," Mr. Lowman said. "Both the coast guard and the customs services, which have been greatly augmented, are making it very difficult to smuggle liquor into the United States."

Referring to the statue of the Prohibition Bureau, established April 1, Lowman said it was "being put on an effective basis by Dr. James M. Doran, prohibition commissioner, and other practical men."

Asked to amplify his statement about radical wets and radical drys, assistant Secretary Lowman said:

Radical Wets and Drys

"By radical wets I refer to those individuals who are unwilling to accept the constitution of the United States and the mandates of Congress and who advocate ignoring and nullifying the prohibition law. They have their adequate remedy in changing the constitution in the regular way by repealing the 18th amendment.

"By radical drys I refer to those well meaning but ill-advised people who are criticizing the efforts of the public officials who are honestly trying to carry out the laws of Congress. Constructive criticism is always helpful but fault finding by over-zealous advocates of prohibition is very harmful to the cause of temperance."

Do You Still Send Her Flowers

In the old sweet vanished days of youth you shared together, you KNEW she loved flowers, you could read it in her eyes; in the shy, breathless moment of pleasure when you gave them to her.

She loves them yet. She loves your thoughtfulness in the little things that mean so much to her. Once you were so attentive. Do you still send her flowers?

THE STATE OF TEXAS.

To the Sheriff or any Constable of Navarro County, Greeting:

You are Hereby Commanded to cause to be published once each week for a period of ten days exclusive of the first day of publication before the return ay hereof, in a newspaper of general circulation, which has been continuously and regularly published for a period of not less than one year in said Navarro County, a copy of the following notice:

THE STATE OF TEXAS

To all persons interested in the Estate of Jesse H. Sawyer, Deceased, Jessie B. Sawyer, Mrs. Mary E. Sawyer and W. A. Sawyer have filed in the County Court of Navarro County, an application for the Probate of the last Will and Testament of said Jesse H. Sawyer, Deceased, filed with said application, and for Letters Testamentary to Jesse B. Sawyer, which will be heard at the next term of said Court, commencing on the first Monday in September A. D. 1927, the same being the 5th day of September A. D. 1927, at the Court House thereof, in Corsicana, Texas, at which time all persons interested in said Estate may appear and contest said application, should they desire to do so.

Herein Fail Not, but have you before said Court on the first day of the next term thereof this Writ, with your return thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Corsicana, Texas this the 18th day of July A. D. 1927.

FRANK R. YOUNG,
Clerk County Court, Navarro County, Texas.
(SEAL)
By L. C. MORGAN, Deputy

Mr. and Mrs. Walter Pierce and Miss Mable Mabry of Richland were in Corsicana Saturday.

Misses Louie Tefteller and Margaret Roderick have returned from a visit to Colorado.

LACK OF BEAUTY IN MANY AMERICAN HOMES IS DECRIED

Special to the Sun.

College Station, Texas, July 30.—"It is pathetic that so many American homes are entirely uninteresting, dull, lifeless and monotonus, because of the lack of beauty—beauty which might be furnished by a few well-chosen pictures," said Mrs. L. P. Chamberlin, professor of clothing and textiles, John Tarleton College, Stephenville, in an address before the women's group at the Farmers' Short Course A. & M. College of Texas.

The pictures that we place on the walls of our homes should be chosen for the decorative effect that they produce in their surroundings, with the other furnishings of the room. In making our selections throughout the house we should be certain that the pictures are within the range of understanding and interest of those who are to live with them. It is quite possible to cultivate the taste for better pictures and to raise the family standard of appreciation by gradually bringing into the home better and better types of pictures.

"The living room should be hung with pictures of general family interest. Especially should the space over the mantel be occupied with a picture which is to be the decorative center of the room. In hanging a picture above the mantel remember that it must be in the right proportion to the mantel itself, at least a foot of space on either side of the picture, less between it and the mantel, and more above it.

"Never allow a frame to detract from the interest of the picture by being too ornamental in itself. Usually a narrow frame a little lighter in color than the darkest tones of the picture is best. Japanese prints look well in narrow black frames; and water colors are pretty surrounded with simple frames of dull gold. Always the frame should form a pleasing transition from the picture to the wall upon which it hangs.

"The most interesting place to hang a picture is over such pieces of furniture as desk or cabinet, the desk or cabinet some objec's piano, divan. Then by placing on which repeat the tones of the picture, or which by rising up on either side of the picture, act as a tie between it and the piece of furniture beneath, you have created a pleasing unity and relationship between it and the piece of furnfture bendath, ouETAOIN a niture and the picture. These groupings are very important as no object in a room should be a thing apart but should seem in some way connected with the other objects near it."

COURT HOUSE NEWS

DISTRICT COURT

Odell Gregory vs. Beulah Gregory, divorce granted.

Ethel Lewis vs. Joe Lewis, divorce granted.

Fannie Shillings vs. Bunard Shilling, divorce granted.

District Clerk's Office.

The following cases were filed: The State of Texas vs. Robert Robinson, bond forfeiture.

Tom Harrell, vs. May Belle Harrell, divorce.

County Attorney's Office.

Walter Carnish, negro, 28 years old, of Kerens, was brought to the Navarro cunty jail, Saturday at noon by Constable D. L. (Moody) Orr charged by complaint with rape and incest. His 15-year-old step-daugater is the complaining witness. A purported confession was made to County Attorney L. J. Woods.

Sheriff's Office.

The Ford touring car stolen here recently from M. H. DeWitt was recovered Friday afternoon near Corbett by Deputy Sheriff Rufus Pevehouse. The tires of the automobile had been taken but otherwise the car was not damaged, it was stated.

Marriage Licenses.

E. A. Foster, Jr., and June Eugar.

Hughie Shaw and Inez Hagle.

FOR HOME AND STABLE
The extraordinary Borozone treatment for flesh wounds, cuts, soures, galls, burns and scalds is just as effective in the stable as in the home. Horse flesh heals with remarkable speed under its powerful influence. The treatment is the same for animals as for humans. First wash out infectious germs with liquid Borozone, and the Borozone Powder complete the healing process. Price (liquid) 30c. 60c and $1.20. Powder 30c and 60c. Sold by Lee Drug Company.

GOAL NOT REACHED YET IN CO-OPERATIVE MARKETING IN TEXAS

Special to the Sun.

College Station, Texas, July 30—"The goal is not yet reached in cooperative marketing, but we believe that a solution of the marketing problem is now reached and it only remains for a sufficient number of years to elapse to educate the farmers of the South as to what the problem is and a correct understanding of the solution," Harry Williams, secretary-treasurer of the Texas Farm Bureau Cotton Association said in an address before the agronomy group at the Farmer's Short Course, during the special cotton program.

"When a clear understanding is had by the farmers of the problem and its solution, the question of sufficient volume will be settled. As we go about our educational work among the farmers, we are also obliged to create and hold favorable public opinion because no business can be furthered in the face of unfavorable public opinion.

"I should like to emphasize one thought and that is that the cooperativev have no easy road to travel. We should get away from fine theories and study on the serious facts which confront us. We must know the probable yield, trend of price, both for raw cotton and the finished product, and the probable need of each of them. We must know the trend of exports and all the information possible as related to these various items.

"Sales could not be made unless the proper grading of the cotton was done. We maintain a staff of expert classers at our warehouses in Houston and in this way know the grade, staple of every bale. We have secured the cheapest isurance, warehousing and financing possible, and this is extremely important because if we could do this there would be no incentive to the farmers to use our service.

"We are now building gins in the state for our members, using only the most modern and efficient machinery and this way we will save an enormous amount of money because these gins will be run to render service for our members and not permit damage to the lint on account of improper ginning. In addition, these gins will attend to the business of marketing, tagging, and shipping the cotton of our members of the Association."

SEVERAL MASONS GIVEN CERTIFICATES PROFICIENCY HERE

Chairman Murray C. Vaughan of the Committee on Work of the Masonic Grand Lodge finished a two-day examination last night, and two dozen certificates were granted for proficiency in the ritualistic work. The examination was held at the Masonic temple in this city. Mr. Vaughan was assisted by James D. Heaton of Barry, Wm. H. Hartfield of Richland, and Christopher J. Knox and Sam J. Helm of this city.

First certificates were granted to I. N. Stokes of Richland and J. C. Patterson of Trinidad. Mr. Stokes is seventy-four years old when he makes his maiden appearance as a certificate man.

Renewals of certificates were granted to the following: H. C. Griffin, and E. G. Tolar of Ennis; Paul Gauntt and A. W. Newbill of Athens; E. A. Jordan, J. E. Walker, John B. Jones, J. H. Bacon and A. J. Crocker of Blooming Grove; W. H. Watson, L. C. Heaton, J. E. Varnell, G. C. Cooper and J. A. Watson of Barry.

The following local Masons were renewed for three-year certificates: Dr. T. W. Watson, A. H. Bonner, Fred White, P. O. Smith, E. J. Hall, Jay Kirkland, Joe Sands and W. O. Allmon.

HUBBARD BUSINESS MAN DIES; RESIDENT THERE 34 YEARS

Hubbard, Texas, July 30.— Ed Hill, aged 57 years, well known business man, resident of Hubbard for 34 years, died at his home Friday morning at 8 o'clock and the funeral was held Saturday with Rev. J. M. Baker, pastor of the Christian church, officiating.

Surviving are his wife, five daughters, Mrs. J. R. Moore, Calvert; Mrs. Daniels, Fort Worth; Mrs. R. B. Pitts, Crystal City; Mrs. Newton Johnson, Venus, Cal., and Mrs. Andy Mecklin, Hubbard; two brothers, Andy and Frank Hill, both of Hubbard; two sisters, Mrs. Jennie Mitchell, Trinidad, and Mrs. Hattie Freeland, Hubbard.

Evangelistic Meeting Closes At Angus

An evangelistic meeting conducted by Rev. Hugh Miller of the Church of Christ was closed Thursday night at Angus. This meeting proved very beneficial to the community. Eight made the good confession and were baptized Thursday morning at the Church of Christ in Corsicana. New religious interest was manifested by the members and as a result regular services will be held each Sunday hereafter.

REPORTER.

Pecos Valley on Boom.

J. M. Boswell, E. L. Bridger and Jess Hart have returned home for a few days from the Pecos Valley oil field. They report things on a boom there.

F. P. M'ELWRATH OF CORSICANA HEADS BANK AT ENNIS

Ennis, July 30.—F. P. McElwrath of Corsicana has been elected president of the First National bank of Ennis, succeeding Edmond Raphael, who died in Dallas Tuesday morning. Mr. McElwrath is a contractor and stockholder in the bank here, as well as being a stockholder in the State National and Corsicana National of Corsicana and the First National and Citizens State Bank of Frost. Joe Jolesch of Ennis, brother-in-law of Mr. Raphael, was elected active vice president and director, and will be actively connected with the management and operation of the bank.

The many friends of Mr. F. P. McElwrath of this city will be glad to learn that he has been elected President of the First National Bank of Ennis, filling the vacancy caused by the death of E. Raphael, former president of this institution. This bank is one of the oldest and most substantial banks in Ennis having a capital stock of $200,000.

Mr. McElwrath was vice president of this bank for some time and his advancement to the presidency was deserved and will prove to be a big asset to his many years of experience in business and banking circles makes him conservative. Mr. McElwrath has lived in Corsicana for a number of years, being prominent in many of its business and civic activities, as well as active in his church work, now serving as superintendent of the First Methodist Sunday School and being a member of its board of stewards.

He is known throughout Texas as one of the big road building contractors, having handled many of the largest contracts awarded by the state and is just completing in the city a number of blocks of new paving and now has several big contracts for government roads in various sections of the state. He is a big land owner, and also has other substantial interests in successful lines of business in other sections of Texas.

While Mr. McElwrath will be president of the Ennis bank he will still be a resident in Corsicana which his many friends will be glad to know.

KERENS PEOPLE GOT THRILL WHEN RIDING IN PEDLEY PLANE

Special to the Sun.

Kerens, Texas, July 29.—Pilot Chas. Pedley of Corsicana flew to Kerens Sunday morning, and during all of the afternoon carried passengers in his big airplane from the Kyser field, two miles north of Kerens.

Despite the heavy downpour of rain at an early hour Sunday morning the big plane was seen as it came out from behind the clouds as Pedley was flying high about 10:30 o'clock. At first those anticipating his arrival here, were out looking for the ship when the roaring of the high-powered motor was heard. Doing a few stunts in the air Pedley piloted his plane to the field and a group of Kerens people were out to greet him.

Pedley has just completed a 5,000 mile air journey in his plane "Texas," flying with the All-Texas Special which toured the east and north, making stops at all of the principal cities in those sections.

The very knowledge of this ship "being in the All-Texas Special" and the fact that it is one of the best planes, heavy enough in weight to afford smooth riding, and equipped with a special built motor of 150 horse power with dual ignition and dual gas tanks, relieved the locals of all fear of taking a pleasure ride, and many of the Kerens people experienced the thrill of flying and seeing Kerens from the air. There were several people on the ground who had never been up in a plane, but they are now thoroughly convinced that aviation is safe, especially when riding in front of Pilot Pedley, one of the best aviators in the state.

Pedley has made Corsicana his home for five years, and is remembered by people in Navarro county as having been connected with the Daily Sun for about two years, delivering the "Sun" to towns between Corsicana and Mexia during the oil boom.

PIONEER RESIDENT OF NAVARRO COUNTY VISITS IN KERENS

Special to the Sun.

Kerens, Texas, July 29.—T. G. Brooks of Port Neches, former resident of Navarro county was here Monday visiting his cousin, J. H. Horn and other relatives. Mr. Brooks was for many years a resident of Corsicana, but resided at Powell, six miles west of Kerens, before the Cotton Belt Railway was built through here in 1881. When Mr. Brooks lived in Corsicana he was County Clerk two successive terms and was for thirty years superintendent of the Odd Fellows Home Sunday School at that place.

He seemed to enjoy his brief visit in Kerens as there was quite a number of the "old timers" gathering about him during the day, at which time much talking of early days ensued.

Revival Meeting

Beginning Saturday, August 6, at Providence Baptist church. Preaching by Bro. J. F. McClung, singing conducted by H. Kentt. Everybody welcome to come.

TREATMENT WHITE DIARRHEA OF BABY CHICKS DISCUSSED

By Associated Press.

College Station, Texas, July 29.—Treatment of bacillary white diarrhea, a disease of chickens, especially fatal to baby chicks during the first five days after hatching is virtually without value and means of relief rests in the elimination of carriers from the breeding flocks, Dr. T. O. Booth, assistant veterinarian and laboratory director of the Live Stock Sanitary Commission of Texas, told poultrymen at the Farmers Short Course, A. & M. College.

Not all infected chicks die of this disease and of those infected and remaining alive about twenty-five per cent will retain the germs in their bodies, although apparently healthy themselves and will be capable of transmitting the disease to susceptible chicks, Dr. Booth said.

The most common site of localization of the germs in the hen is in the ovary. They are contained within the yolks of some eggs when layed. Chicks hatched from such eggs are infected at the time of hatching and their discharges will infect healthy chicks of the brood.

These carriers of the disease are a constant source of danger to all susceptible chickens with which they are associated and it has been found that upon reaching the productive age they will lay about twenty-five per cent less eggs than the uninfected pullets of the flock.

To assist the poultry breeders of the state in ridding their flocks of this disease the Texas Live Stock Sanitary Commission is offering to co-operate with any poultryman making application for such aid, Dr. Booth said.

"The Commission will furnish leg bands for identifying the individual birds, furnish tubes for collecting the brood samples and containers in which to ship them and will apply the agglutination tests to the samples free of charge to the owner. The flock owner is to agree to test all birds in his flock, have the samples collected and the removal of rectors and sanitation of his premises supervised by an approved veterinarian and pay the express charges on the sample cases to and from the Laboratory.

"Upon the completion of the tests and the receipt of a certificate from the owners' veterinarian that all rectors have been properly removed from the premises and that the premises have been properly cleaned and disinfected, a certificate of test will be issued the owner and after a flock has been tested for two consecutive annual tests and no infected birds found, a certificate designating the flock as 'bacillary white diarrhea free' flock will be issued.

"Flock owners interested in having a test made of their flock should consult their local veterinarians or make application direct to the Texas Live Stock Sanitary Commission 701 Wheat Building, Fort Worth, Texas."

TEXAS POWER AND LIGHT COMPANY IS EXTENDING SERVICE

The Texas Power and Light Company is extendings its transmission lines from its large substation at Navarro to Angus, Pickett, Corbet and Purdon. A branch line is being projected from Pickett to the rock quarry just south of Richland Creek, near Love Bridge. The machinery used in operating this large rock quarrying plant will all be electrified. There will be approximately 500 h. p. of electric energy put into use at this plant. The capacity of the plant will be greatly increased. The management of the rock quarrying plant announces that the Southern Pacific Railway Company has contracted for a large percentage of its output for the next several years.

The building of these lines means the electrification of the John D. Storey gin at Angus, as well as the large gin at Picket and the Johnson gin at Corbet, together with the gins at Purdon. Other industrial establishments will utilize electric power in these communities.

The above announcement was made by Mr. R. F. Sikes, District Manager of the Texas Power & Light Company, with headquarters at Ennis. Mr. Sikes mentioned the fact that this line was of the character that would permit farmers along the route to have electric service at reasonable expense and also said that several of them had already made arrangements whereby they could have electricity in their farm homes. He stated that at the present time his Company was serving seventeen towns in Navarro County, including the above mentioned ones to which his Company's lines are now being extended. He said that Ted B. Ferguson, one of his assistants, was now devoting all of his time to his Company's business in Navarro County, and it was Mr. Sike's opinion that the establishment of a branch office of the Company at Corsicana would soon be necessary in order that the the Company's patrons in Navarro County could have an accessible place for transacting business with the Company, as under the prevailing conditions, Ennis is the nearest district headquarters where business can be transacted.

MAGNOLIA SPUDDED IN CHATFIELD TEST SURFACE PIPE SET

Keeping the Corsicana oil field record of continuous activity unbroken, the Magnolia R. L. Hodge 1 at Chatfield was spudded in Thursday and twelve and a half inch surface casing was set at a depth of 43 feet. Drilling will be resumed on this test Monday.

Officials of the Magnolia announced Friday that the new test would be taken to the Woodbine sand, and that circumstances would determine whether or not the well would be drilled to the Trinity. The new test is approximately six miles almost due east of the test drilled at Rice.

Work on both the Wild Rose Oil Company's Little No. 2 and the Thomas J. Jones et al Little No. 1 has been suspended. The wild Rose has been shut down for several days while parts for the rig can be secured. The Jones test is shut down because of lack of water for drilling.

The Earle and Ragsdale test offsetting the Elliott and Clarks discovery well in Cherokee county continues to hold the attention of the oil fraternity as tests of the various sands encountered show salt water and oil alternately. Cores taken of the sand between 4342 and 357 showed traces of oil Thursday evening when given an ether test. The crew was still coring Friday.

The Southern Pine A-2 was coring at 4768 in hard sand Friday, while the Southern Pine B-1 was drilling around 4124 feet.

COURT HOUSE NEWS

District Court

The jury in the case of O. Mayfield, negro merchant, charged by indictment with the violation of the prohibition laws, returned a verdict of guilty and assessed the punishment at two and one-half years in the penitentiary late Thursday afternoon. The case started Wednesday and the testimony was concluded Thursday noon. The charge of the court an the argument of the attorneys were given Thursday afternoon. Considerable interest was manifested in this case particularly among the negroes.

The jury for week was excused by District Judge Hawkins Scarborough Friday morning.

District Clerk's Office

The following cases were filed: Will Glenn vs. Globe Indemnity company, compensation.

Reba Howell Gore vs. Joe Dillard Gore, divorce.

Oil City Iron Works, a corporation, vs. W. F. Pierson, et al, sequestration.

Marriage License

Jim Ward and Elsie Page.

Asignments

Hooser Oil and Development company to John W. Hooser, 1-2 interest in 20 acres of the Matthew Boren League. $1. and other considerations.

Hooser Oil and Development company to John W. Hooser, interest in 50 acres of the Matthew Boren League. $1. and other considerations.

Royalty Deed

Hooser Royalty company to John W. Hooser, royalty interest in 100 acres of the Matthew Boren League. $1. and other considerations.

Warranty Deed

Maggie Kerr Saunders to Carmelita Z. Kerr, Lot 6, Block 7, J. B. Barry Addition, Corsicana. $1. and other considerations.

Justice Court

One plead guilty to an affray in Judge Sam B. Jordan's court Friday morning.

The Sick and Convalescent.

Miss Melvin Hobbs underwent an operation for appendicitis at the Navarro County Hospital Thursday evening.

Mrs. I. E. Zoller underwent a major operation at the Navarro County Hospital Friday.

R. L. Tucker of Currie, who has been in the Navarro County Hospital for several days following an operation, was able to be moved to his home Friday.

Mrs. J. J. Longbotham of Wortham was able to be moved to her home Friday following an operation several days ago.

Mrs. Kate Shepard, who has been in the medical ward at the Corsicana Hospital and Clinic for several days was able to be moved to her home Friday.

Mrs. J. F. Lumsden was rallying well from a major operation Thursday.

F. K. Irwin, formerly of Houston but now of Fairfield, construction foreman for the Gulf Production Company, is in the medical ward of the Corsicana Hospital and Clinic.

DRINKING FOUNTAINS HAVE BEEN INSTALLED COUNTY COURT HOUSE

Workmen are busy Friday putting the finishing touches to the installation of the electric cooling sanitary drinking water system in the Navarro county courthouse. The electric refrigeration plant has been connected and is cooling the water for the fountains in the basement, first and second floors of the courthouse. A few more additions will be made before it is finally turned over to the county.

The new plant replaces the old kegs in use for years equipped with public drinking cups. The new system is fountains, the latest in electric refrigeration.

SCENES OF DEATH AND TERROR TOLD OF QUAKE ON MAY 23

By Associated Press.

London, July 29.—Scenes of death and terror are described in the first detailed account to come out of the "Wild West" of China of the great earthquake which occurred in Kansu province May 23.

The details, telling of the complete destruction of the cities of Sisiang, Liangchow, Tumentse and Kuland and innumerable towns and villages, with a casualty list estimated at 100,000 show that the disturbance may be classed among the most terrible catastrophies of all time.

Monsignor Buddenbrock, Vicar Apostoline of the Steyl mission at Lanchow, Kansu, gave the details in a letter, an outline of which has been sent to the Westminster Gazette by its Shanghai correspondent.

It says that in Liangchow alone, at least 10,000 were killed, while a moving mountain completely wrecked the city of Tumentz.

Scores of worshippers at mass in the church at Sisiang were overwhelmed by the sudden collapse of the edifice as subterranean rubmlings were heard. Priests worked for hours administering the sacrament to the dying, and carrying the injured to places of safety.

Not a house in Sisiang escaped damage, and in each dwelling there were dead and dying. Throughout the earthquake area the populace suffered untold miseries.

Monsignor Buddenbrock says that at some places, great fissures appeared in the earth, from which a bluish black liquid spurted.

Ten Thousand Reported Drowned

By Associated Press.

Shanghai, July 29.—The Chinese newspaper Shih Pao reports that 10,000 persons have been drowned and 100,000 rendered homeless by flooding of the Kiulung river in Fukien province.

The mountain floods were particularly destructive in the region of Changchowful, west of Amoy, the damage beng estimated at more than $2,000,000.

Many Killed and Injured in Fire

By Associated Press.

Hankow, China, July 29.—More than 150 soldiers and civilians were killed and hundreds injured as a consequence of an unexplained fire at an army ammunition base at Wuchang, across the Yangste from Hankow, yesterday, most of the deaths were caused by the explosion of gun powder and bullets.

The entire district surrounding the base was reduced to ruins. American Missionary properties in the explosion zone were wrecked.

FAMOUS WOMAN EVANGELIST WILL CONTINUE IN WORK

By Associated Press.

Los Angeles, July 29.—Morning and early afternoon papers blazoned forth the announcement today by Aimee Semple McPherson, evangelist, that she intended to resign her leadership of Angelus Temple and move to other fields. A few hours later she recalled that statement and said there would be no "immediate change."

By Associated Press.

Los Angeles, July 29.—The Times says Aimee Semple McPherson will surrender the control of Angelus Temple.

The evangelist announced last night that she would submit her resignation to the church committee now engaged in re-organizing the business affairs of the Temple, to become effective as soon as Mrs. McPherson's position as pastor can be filled and the present squabble between the pastor and her mother, Mrs. Minnie Kennedy, can be ironed out.

Torn between her desire to continue her work here and the wish to engage in world evangeliscal work, the evangelist said she had made her choice and would leave Los Angeles, according to the Times.

Previously she had announced plans to change Angelus Temple to the Four Square Gospel Lighthouse, with branches in cities throughout the United States and herself as admiral of the religious fleet they would represent. Denver, Chicago, and New York, she said would be the principal centers of her new work.

PRACTICALLY ALL NORTHWEST TEXAS DRENCHED BY RAIN

By Associated Press.

Wichita Falls, Texas, July 30.—Practically all of Northwest Texas was drenched Friday afternoon and night and by 8 a. m. Saturday the rainfall here had measured 1.24 inches with the skies still overcast with threatening clouds.

Read the Sun—get all the news.

SUDDEN SQUALL OFF CHICAGO LAKE SHORE BROUGHT DISASTER

By Associated Press.

Chicago, July 29.—A sudden off-shore squall that passed in a few seconds to leave the lake as smooth as a mill pond capsized a small pleasure steamer late yesterday, carrying at least 27 of the passengers, mostly women and children, to their deaths.

The tragedy came almost 12 years to a day of the date of Chicago's greatest water disaster, the sinking of the steamer Eastland with a loss of 812 lives. The two resulted from the same cause—the rush of passengers to the port side of the ship.

Sixteen of yesterday's victims were children—ten boys and six girls—ten were women and one man. Some 75 women and children and a half dozen men were thrown into the water when the vessel—the Favorite—toppled over, but 50 or more were saved, some in a thrilling rescue by William Hofnauer, millionaire yachtsman, who chanced to be cruising by in his large yacht, the Doris, when the storm broke.

Steamer Is Raised.

While divers searched the lake bottom near the scene for more victims, derricks lifted the craft late last night as flood lights were played on the tragic picture. The last five bodies were found as the ship came to the surface, seven hours after the Favorite floundered.

It was a gay crowd of excursionists that left Lincoln Park aboard the vessel in the late afternoon for the two mile run to the Municipal Pier.

A two-piece negro orchestra—banjo and mandolin— strummed "I'm Looking Over a Four-Leaf Clover;" children scampered along the two decks and their elders hung over shoreward rails.

Suddenly, when a mile out, a rain storm broke and with it came a gust of wind out of the Northwest. As the captain, Arthur Olson, who has sailed the lake 18 years, sought to head his boat into the wind the passengers rushed to the port side, away from the driving rain. The boat dipped sharply and as the lake water surged over the decks, turned over.

Children Drown Quickly.

Children, candies and popcorn still clutched in their hands, fought to free themselves, but the weight of chairs and other encumfrances on deck held them under. Some were thrown free of the boat and many of these grabbed up belts and rafts as the steamer righted itself and sank until all but the roof of the upper superstructure was submerged.

Twenty-one bodies were recovered before the steamer was raised to be towed ashore. The others were found after the craft was brought to the surface.

Small Crew Save Many.

The five members of the crew escaped and these, all experienced sailors, saved many from drowning by tossing life preservers and rafts to those in the water. The Favorite's two life boats also were unleashed and into these clamored a number of the survivors.

Word of the tragedy sped along the lake front, a popular resort for swimmers, and small boats put out to the rescue. The first to reach the scene was Mr. Hofnauer's yacht, Doris. Hofnauer and his companions saved a number of persons.

Today a triple inquiry into the accident was under way. One was an inquest, the other investigations by Michael Hughes, chief of police and State's Attorney Robert M. Crowe. Olson and his crew were arrested shortly after the tragedy.

Acts of Heroism.

Out of the sudden disaster came acts of heroism and devotion. Olson, at the wheel of the boat, leaped through a cabin window, into the water, turning back to drag several of his passengers from the boat. Pulling himself along the side of the boat he also cut away preservers, tossing them to persons floundering near the steamer. His daughter, Katherine, 9, also assisted several children to gain rafts or boats.

Leo Sobata, an army officer, whose hand was mangled, told of throwing four children into a boat. Sobata related his experience as his hand was being dressed:

"I got four kids and a woman. The boat was full of water and we couldn't get any more in. A girl started bailing out with a straw hat. I was dizzy. When the Favorite went down she listed—" and he swooned.

Opal Helton, 18, of Hugo, Okla., visiting in Chicago, dragged two little girls through a window and held them afloat until a member of the crew pulled them into a life boat.

Boat's Master Breaks Down.

"It was terrible. I wish I had gone down with the boat," Olson murmured as he watched his steamer being raised. At that instant a life guard reached into the first aft deck and dragged out a small boy.

"It's horrible—horrible, I tell you," the boat's master shouted. "I did the best I could—I tell you man, it as terrible and I had only recently spent a lot of money improving the Favorite."

Sixteen-year-old George Holmes of Berwyn, Ill., saved his father and attempted to rescue his mother, but she had died from shock and heart disease. A mother of five children, Mrs. Gertrude Berndt, who also was aboard the Eastland when it capsized in the Chicago river, again escaped death on the Favorite. Four members of her family, a married daughter, a grown daughter, nephew and sister-in-law, were drowned.

As rescue work got under way, Commodore Eugene McDonald, sportsman and sailor, reached the scene and he was one of the first to don a diver's helmet and go below to explore the submerged craft. Throughout the night he remained aboard his yacht and aided in raising the Favorite.

"It seems too bad that such a catastrophe should happen to the best boat and the best pilot in the excursion service around Chicago," was the comment of the Coast Guards and life saving crews who are often called upon to go to the rescue of these little vessels.

Casualty List.

By Associated Press.

Chicago, July 29.—Following is the Favorite casualty list:

MRS. SARAH REZNICK, aged 24.

BERNARD RESENICK, aged 5.

AGED RESIDENT OF NEW RALEIGH DIED LATE WEDNESDAY

Dawson, Texas, July 29.—G. W. Vest, aged 88 years, died in the New Raleigh community Wednesday afternoon and the remains were interred in the Dresden cemetery Thursday afternoon. The services were in charge of the Dawson Masonic Lodge.

Mr. Vest was born in Morgan county, Alabama, March 4, 1839. He moved to this section in 1900.

Surviving are three sons and one daughter.

He had been a member of the Baptist church for sixty years.

Probe Fails to Find Negligence

By The Associated Press.

Chicago, July 29.—A preliminary investigation by the state's attorney failed today to disclose any evidence of criminal negligence or violation of any state law it was revealed today as four inquiries were under way into the capsizing of the Favorite, small excursion boat, yesterday in Lake Michigan, with a known loss of 27 lives.

Rotten straps on life preservers was one of the first discoveries by Coroner Oscar Wolff during an inspection of the Favorite today. The craft had been raised and towed to the Randolph Street docks. One life preserver bore a date of 1910, and a 1927 inspection stamp.

Federal steamboat inspectors, the state's attorney, the coroner and the police launched a quadruple inquiry ino the disaster as diverse and harbor craft continued today to search for other bodies.

Approximately 75 persons were aboard the craft. Sixteen of the victims were children. The other were ten women and one man.

The coroner asked a number of licensed skippers, prominent men of experience on the lakes, to sit on the jury which this afternoon planned to inspect the boat and the bodies of the victims before opening the inquest.

After questioning a number of persons, William A. Rittenhouse, assistant state's attorney announced that no evidence of any violation of the law had been uncovered.

Federal Probe of Disaster Ordered

By Associated Press.

Washington, July 29.—Extraordinary efforts were made today by the United States Steamboat Inspection Service to get under way an investigation into the disaster of Lake Michigan involving the loss of the steamer Favorite and many lives.

Dickerson Hoover, chief of the inspection service ordered Frederick J. Meno, supervising inspector at Detroit, to proceed direct to Chicago to sit with the local inspectors there in the [illegible] which will be held immediately.

CHILDREN'S FATAL DISEASES
Worms and parasites in the intestines of children undermine health and so weaken their vitality that they are unable to resist the diseases so fatal to child life. The safe course is to give a few doses of White's Cream Vermifuge. It destroys and expels the worms without the slightest injury to the health or activity of the child. Price 35c. Sold by Lee Drug Co.

MEXICO HAS BEEN WITHOUT PRIESTLY CEREMONIAL IN ANY OF MANY CATHOLIC CHURCHES

By Associated Press.

Mexico City, July 31.—For one year Sunday, July 31, Mexico has been without priestly ceremonial in any Catholic church, as a result of the government's religious regulations.

Probably no other county overwhelmingly Catholic has ever known a twelve month wherein no priest of that faith has officiated in any of its churches.

The Mexican Episcopate ordered its priests to withdraw from their churches and to cease services therein, concurrently with the taking effect of the religious regulations, as a protest against them. Until that time Catholic services by priests in its churches had never in Mexico been stilled for a day since the Spanish Conquistadores brought the Cross to the western world four centuries ago and planted it in the ruins of the Aztec Empire which they overthrew.

Mexico's religious problem has existed since the middle of the last century, but it had slumbered for several decades until made acute again last year by President Calles' promulgation of the present regulations.

Those regulations limit and supervise activities of the church and its priests and require the latter to register with the civil authorities. Catholics maintained that such registration would be acceptable of the Mexican government instead of the Pope as the supreme authority of the church; that the regulations menaced religious freedom, constituted Catholic persecution, and would destroy that church in Mexico. Calles insisted that his only purpose was to enforce the Mexican constitution. Neither side has yielded.

Calles' term of office expires December 1, 1927. Catholics hope the controversy may be adjusted under his successor, if no compromise can be accomplished sooner.

Prelates Expelled

During this year of deadlock between the government and church, a so-called Catholic revolution has been suppressed by the federal authorities; the foremost Archbishops and Bishops of the Catholic Church have been expelled from Mexico and are exile in the United States, mostly in San Antonio, Texas, and many Catholic laymen have been arrested on charges by the government that they plotted revolution.

Recently President Calles ordered the release of Catholics imprisoned on sedition charges. The President's announced reason was that since the attempted Catholic revolution had failed, the alleged lay plotters were no longer a menace to the government, and did not deserve further imprisonment.

With the exception of the great historic Mexico City Cathedral, other places of worship have continued open. The Cathedral has been closed a year. Churches are in charge of citizens' committees. Worshippers enter them at will. Services are conducted by the laity, both men and women, insofar as it is possible for them to replace priests. Religious services are secretly performed in private residences, although priests and participants are subject to arrest.

Catholic church property in Mexico was declared nationalized in 1856. The constitution of 1857 and the "reform laws" thereunder deprived the Catholic Church of much property, placed sharp restrictions upon its activities and caused the "reform wars" which lasted three years and amounted to a religious war. Juarez, reform leader, won. In 1861 he banished Catholic bishops and the Papal Nuncio from Mexico and turned over great tracts of church land to the people.

Pendulum Swings Back

Then the pendulum swung the other way. There was the French intervention, Maxmilian's ill fated empire, the rise to power of Porfirio Diaz. The bitterness of religious war subsided. The religious laws became dead letters. In 1911, Diaz who had been President of Mexico for 27 consecutive years, and for all practical purposes dictator, was overthrown by the Madero revolution. Diaz had not molested the Catholic church.

From the beginning of the Madero revolution in 1910 until General Alvaro Obregon became president in 1920, Mexico was constantly torn by civil war and no attention was paid to the religious problem. Obregon's administration knew some revival of the problem, but still there was no acute issue.

Meanwhile the 1917 Constitution, embodiment of the principles of the revolution that overthrew Diaz, rewrote all the old "reform war" religious regulations and made more drastic, and comprehensive. (That Constitution also produced the oil and alien land laws which have made tense Mexico's relations with the United States. In order to prevent another Diaz dictatorship it said no President of Mexico should be reelected. Last year Congress amended the Constitution to permit re-election "after an intervening term." Thus Obregon is now a candidate to succeed Calles and the issue has arisen of "re-election" or "no re-election.")

Last year Calles construed the Constitution to mean that the long dormant religious laws should be revised, and issued a decree promulgating the regulations.

Catholics sought last year to amend the religious articles of the constitution, but the effort failed.

REPRESENTATIVE OF STATE DEPARTMENT EDUCATION COMING

Frank Ban Winkle, Austin, from the State Department of Education, will be the principal speaker at the annual meeting of the trustees of the common schools of Navarro county, the members of the county school board and all others interested in school, which will be held at the Navarro county courthouse Wednesday morning at 10 o'clock, Andrew G. Steele, county superintendent, announced Monday morning.

A large attendance is expected at this annual meeting and all persons of Navarro county who are interested in the schools are urged to be present for this meeting.

FUNERAL SERVICES SUNDAY AFTERNOON FOR YOUNG WOMAN

Funeral services for Ella May McFadden, aged 21 years, who died in a Dallas hospital Friday, were held from the home of her father, William T. McFadden, 1064 South Seventeenth street, at 2 o'clock Sunday afternoon, with interment in Oakwood cemetery.

Rev. M. A. Turner, pastor of the Eleventh Avenue Methodist church conducted the funeral services.

Active pallbearers were, Richard Stubbs, Lee Russell, Clyde Russell, Luther Waters, Edward Langston, Moses Shoemaker.

Spray Alfalfa Weevil

Spraying with calcium arsenate is the most dependable means for controlling alfalfa weevil, responsible for destruction of half the first cutting and nearly all the second cutting of the alfalfa crop in several states o the Great Basin. The bst time to spry, agriculturists advise, is several days beore the feeding of the larvae reaches its height.

MANY ACRES FINE LAND IN TEXAS CAN BE EASILY RECLAIMED

STATE RECLAMATION ENGINEERS SPEAKS ON DRAINAGE AND LEVEES

Special to the Sun.

College Station, Texas, Aug. 1.—"Along the creeks and rivers of Texas there are millions of acres of virgin land subject to reclamation by drainage and by levees at reasonable cost," B. F. Williams, state reclamation engineer, said in a discussion of the levee and drainage possibilities indicated by topographic surveys, given at the water conservation and utilization meeting, Farmers' Short Course.

"Many streams are now choked with weeks, brush and silt. The valley is sometimes cleared, and attempt made year after year to cultivate it, only to be abandoned after several plantings. It has never occured to the farmer to improve the channel in order to keep the water in it. Water in one respect is like people—it takes the course of least resistance. If the valley is clear of obstructions and the channel is filled with brush, weeks, and silt, the water will take the farmer's fields and crops in the valley.

"Reclamation by channel improvement and rectification has been practiced very successfully by some engineers in narrow valleys, but absolute protection against maximum floods can rarely be accomplished by this method. But the greater floods occur once in a 10-20 year period, and it is more economical to take the loss than to protect the land against them. Another advantage in this method of flood control lies in the fact that if a larger flood comes than has been prepared for, it can spread out over the valley without doing any damage either to the lands or the flood control structures.

"In the larger valleys complete protection can be secured by levees. This is the oldest, most dependable and most universally used method of flood control, having originated along with earliest agriculture. This may appear to be a very easy and simple method, but in actual practice it is apt to be very difficult.

"About 1,500,000 acres of river bottom of the state have been mapped by the State Reclamation Department with a view to aiding in bringing these neglected fertile lands into the common stock and making them available for cultivation.

"Very important reclamation undertakings are proceeding in Cameron, Willacy, and Hidalgo counties, and in Wharton and Matagorda counties. The city of Dallas has in view a great levee system for the protection of the city and the development in various ways of the present unsightly tracts in the Trinity bottom in front of the city."

Hints for the Farm

Furnished by the DEPARTMENT OF AGRICULTURE

Meat spoilage is a source of serious loss both to commercial establishments and to the farmers. To prevent spoilage it is necessary to reduce meat temperatures below 40 degrees Farenheit as soon as possible after slaughter. Salt used in curing is a check to spoilage. Growth of organisms will be prevented if th emeat has taken up even as little as 3 per cent of the salt.

Approximately 4,000,000 tons of phosphate are lost or wasted annually in the United States during the treating process, conducted as the phosphate rock is mined. There are also enormous deposits unsuited for the manufacture of acid phosphate because they contain impurities or comparatively little phosphate. The government is developing methods for utilization of these low-grade and waste materials.

The interplanting of irrigated orchards with other crops is frequently practiced with profit to the grower and without injury to the trees, provided cover crops take the place of intercops before the trees produce in quantity.

Bulls kept in close quarters with little exercise frequently develop long hoofs. This condition not only is unsightly, but may become painful, so much to that the bull cannot stand or walk naturally. It may bring on other troubles, such as foot rot. The hoofs should be trimmed or they will break off and disfigure the feet.

Making corn into silage does not add any nutrients, but it does add layer of dark-colored vegetable of the feed as compared with corn fodder in its dry state. If the corn is cured as dry fodder, incluing ears and stalks, the cattle do not eat the entire stalk as they do when the crop is made into silage.

Leaves, small twigs and other tree litter decompose and form a layer of dark-colored vegetable mold which enriches the soil and stores up moisture. By means of this mold the binding of the soil at the roots of the trees and the resistance of the trunks to the rapid flow of water from gullying or deprevent floods from gullying or destroying the land by erosion, particularly on steep slopes.

ALL EUROPE A TEXT BOOK

Five hundred American farmers, under the leadership of Sam H. Thompson, (above), president of the American Farm Bureau, are to visit Europe this Summer. Pictures show construction work on the great dyke system of Holland, and part of one of the famous cheese markets of Europe, which will be among the things the American farmers will investigate.

(International Illustrated News)

500 Agriculturists Visit Europe, Seeking Benefit of Thousands of Years' Experience

By L. E. EARLY.

International Illustrated News Staff Correspondent.

CHICAGO (I-I-N).—The American considers the domestic agriculturist the best in the world. Haven't America's resources for obtaining fertilizer, modern tractors, the introduction of electric time and labor-saving devices, and the cooperation of the Departments of Agriculture and Commerce made the American farmer the greatest in the world?

In some ways, yes. But the fact remains that the American has much to learn from the European farmer. For example:

In Eastern United States vast acreages lie fallow, uncultivated because a little over 100 years of farming has left the soil unproductive. Yet Europeans are raising fine crops on land that has been tilled for 2,000 years.

The American farmer has come to a realization of this. On July 30 five hundred agriculturalists from forty-five States sail on a two months' study of European methods. The party is under the auspices of the American Farm Bureau Federation and the United States Department of Agriculture. Sam H. Thompson, of this city, president of the federation, leads the party, the greatest agricultural investigation expedition in history. It may seem strange to some that while Europe is sending over hundreds of investigators to learn American business methods, America is sending over five hundred investigators to learn European farm methods.

Chief among the things that the Americans will study are:

The great irrigation systems of Denmark and Holland and the successful drainage systems in Holland.

Waste land reclamation in Germany and Denmark, with particular interest in reforestation in those countries and the terracing of slopes along the Rhine.

The highly successful co-operative marketing plans in vogue in many of the European countries.

Slaughtering, egg packing and meat packing in Denmark.

Landscape gardening in France and England.

Economic movements under way to better the condition of the farmer and his employe.

The cheese industry of Holland.

The famous breeding establishments of Europe, including those of the Island of Jersey.

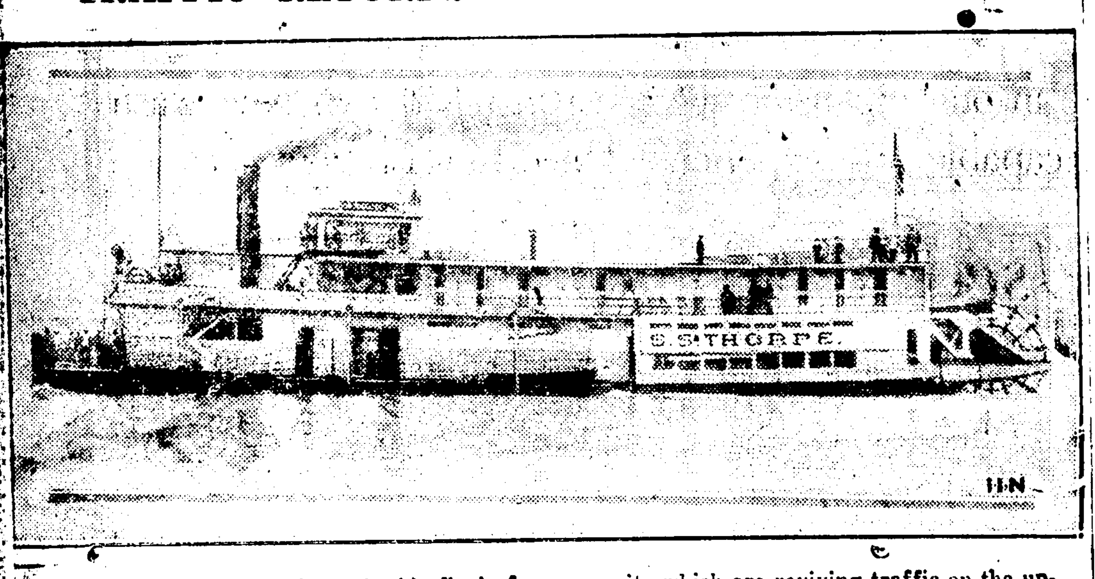
The great co-operative seed exchange of Roskilde, Germany.

The large farms near Stettin, Germany, built on reclaimed moor land.

Half a million dollars will be spent in making the trip, not counting money spent for recreational purposes. Each of the 500 farmers is paying $985 as his share. The European end of the trip is being arranged by George C. Haas and Edward A. Foley, European representatives of the Department of Agriculture.

The route is over 9,450 miles, and is through seven countries and forty-three cities. The party is to sail for home, via Montreal, on September 17.

TRAFFIC RETURNS TO UPPER MISSISSIPPI



The towboat Thorpe, first of a big fleet of power units which are reviving traffic on the upper Mississippi River, steams away from Dubuque, Iowa.

(International Illustrated News)

Steamboat Whistles Broadcast the Return of Trade to Upper Reaches of Mississippi

By GERALD COSGROVE

International Illustrated News Staff Correspondent.

DUBUQUE, Iowa (I-I-N).—Sonorous whistles resounding over the low countries of Missouri, Iowa, Wisconsin and Minnesota announce the return of commercial traffic to the upper Mississippi River. After ten years this great artery is resuming importance in commerce.

Barges of sugar and coffee have been towed from St. Louis to St. Paul on the maiden trip of the towboat Thorpe, the first built, with the assistance of the Federal Government, for the revival of river traffic

Three other towboats are now under construction, and the fleet, which will be in operation before Winter, will include sixty big steel barges. Each towboat is capable of pulling fifteen of these cargo carriers.

The accoutrements of steamboating in the days of Mark Twain are missing. The towering white steamboats, which were steered with a huge spoked wheel in the pilothouse, have no place in the new river traffic. The place has been taken my low-lying, powerful crafts which are guided by electricity, and which report their progress to terminals by radio.

The Thorpe and its sister-ships are oil burners, having a maximum speed of sixteen miles an hour. Each is 160 feet long and weighs 300 tons. Up to 1,000-horsepower can be developed. Licensed radio operators are members of the crew of each towboat.

Terminals are now being constructed in larger cities along the upper River to facilitate the interchange of rail and barge cargoes.

The Sick and Convalescent.

Miss Allyne Bayless is in the medical ward of the Corsicana Hospital and Clinic.

Joe Conn, employee of the Simms Oil Company, had the index finger of his right hand badly mashed Saturday afternoon, necessitating its amputation. The operation was performed at the Corsicana Hospital and Clinic and he was able to return tl his home Monday.

F. K. Irwin, employee of the Gulf Production Company at Fairfield, who has been in the Corsicana Hospital and Clinic several days, was able to return home Monday.

R. L. Sloan of Hillsboro was in Corsicana Monday.

John A. Woodford of San Antonio is in Corsicana on business.

Miss Euba Bell spent Sunday in Blooming Grove.

When people are wanted, they expect to be them through the Daily Sun and Semi-Weekly Morning Light.

JUST BEFORE THE CROCKERY SHOWER BEGAN

A few minutes after these pictures were taken at the Stillman-Wilson wedding at Grand Anse, Quebec, the photographer who took them was being showered with crockery by Mrs. James A. Stillman, mother of the bridegroom. She became incensed at the picture-makers when they got too close to the ceremony. Larger photo shows the marriage ceremony; in inset the bride is seen cutting the cake with "Bud."

(International Newsreel).

FIRST PHOTO OF BOBBY JONES AT ST. ANDREWS

National patriotism didn't keep Bobby Jones from being Scotland's favorite in the British open championship at St. Andrews, and the Atlantan's sensational showing in winning the title has caused him to become the great hero of the land of the heather. Photo gives an idea of the gallery that followed him. It was taken during the first day's play.

U. S. To Display Great Chicken Industry

Methods employed in the billion dollar chicken industry of the United States will be exhibited at the World Poultry Conference in Ottawa, July 27 to Aug. 4.

Special trough (top) keeps poultry food clean. Lower left—Dr. John R. Mohler, chief United States Bureau of Animal Industry. Right—Model farm poultry yard.

By Associated Press.

Washington, July 21.—While 12 nations applaud the spectacle, the United States will display its mammoth $1,250,000,000 chicken industry before the World Poultry Congress at Ottawa, Canada, July 27 to Aug. 4.

Stately monarchs of the American Poultry Association's prize-winnings pens, their regal consorts and crested offsprings, together with the entire United States National Live Bird Exhibit, will be arrayed with other fowls from every corner of the earth.

The United States Office of Exhibits will demonstrate by detailed models, the story of this country's poultry business from the nest to world-wide markets; specialists will tell how breeders sold 300,000,000 baby chicks last year and statisticians show that egg production reached to billion dozen, or 760 eggs each second.

Climaxing exhibitions of poultry eminence, Dr. John R. Mohler will explain what made it possible. He is the United States Chief of Animal Industry. His will be the opening lecture on control of epidemics, diseases and infection.

Dr. Mohler insists on healthy flocks for increased meat and egg production. He is expected to outline quarantine control; tell how it halted European Fowl pest, "chicken influenza," three years ago; summarize control of bronchial infection, and suggest steps against bacillary white diarrhea, greatest common enemy of young stock.

Foreign pathologists and veterinarians are to join the study of agglutination, a blood testing process for locating diarrhea carriers.

Among 170 papers will be those by American experts on nutrition. The United States is foremost in successful poultry feeding. The papers will stress importance of the all-mash measured ration, and show that cleanliness in pens, the cars and shipping terminals, circumvent huge market losses.

Poultry's presentation as an economic factor falls to Dr. G. I. Christie, of Purdue. Known to agriculture as the sixth in value, poultry products now comprises the nation's fastest-growing farm activity.

Secretary of Agriculture Jardine, named to answer Viscount Wellingdon's address of welcome, may join the governor-general in suggesting poultry standards, a system of international grades and classes guaranteeing that shipments of breeding stock, eggs an market fowls, will meet the needs of buyer countries.

English theories likely will predominate if standards be evolved. The great London market, clearing house for Europe's poultry produce, alrady leads in designating grades.

The congress will be followed by a tour to end here. Foreign delegates as well as poultry dealers from all sections of the United States, are going to Cornell, where science operates the world's largest university chicken farm.

At New York the group will view market scenes. In New Jersey the party will inspect the continent's foremost chicken farms. Flocks there average 1,000 fowls, and may boast in sereval cases twice that many.

TERZIGNO LIES IN PATH OF LAVA AS IT MOVES DOWN VALLEY

By Associated Press.

Naples, Italy, Aug. 1.—A stream of molten lava menaced the town of Terzinga this morning as the blazing fluid, following a new exulosive outbreak within Mount Veplosive outbreak within Mount Veof Hell" into the ravines leading toward the Bay of Naples.

Resumption of the volcano's disquieting activity, fulfilling the worst fears of the members of the observatory staff, came after a lull of more than 24 hours.

Beginning yesterday morning, the eruption progressed unceasingly until the early hours this morning when the lava, having filled the "Valley of Hell" rose above the dikes erected to check its flow into the valley, and then began to run down the paths toward Terzigno.

Despite the fact that the movement of the lava stream was comparatively slow, a large section of the population of Terzigno and neighboring region began to flee towards Naples at dawn.

KNIFE AND PISTOL FIGURE IN BATTLE AMONG NEGROES

Walter George, negro, is in the Navarro county hospital in a serious condition and Ray Reagor, negro, is in the Navarro county jail and Sylvester Mullins, negro, is out on bond in the sum of $1000 in connection with an altercation in East Corsicana, Saturday afternoon.

George is suffering with severe knife wounds received in the abdomen by a knife alleged to have been weilded by Reagor. Mullins, a brother-in-law of George, took six shots with a pistol at Reagor, but none touched him.

The bond of Reagor has been set at $1,500, but at 2 o'clock Monday afternoon he had not been released.

Domestic trouble was assigned as the reason for the trouble.

Hospital attaches reported that the wounded negro was doing as well as could be expected Monday afternoon.

Reagor and Mullins surrendered to city officers at the police station and were taken in charge by Deputy Sheriff Rufus Pevehouse, who was at the city police station at the time.

FIRE INSURANCE RATES ORDERED BE LOWERED 9 TOWNS

By Associated Press

Austin, Texas, Aug. 1.—Fire insurance key rates were ordered lowered for nine Texas towns and increased for nine others by the state fire insurance commission today.

Decreases include Austin, 26c to 25c; Cortulla 79c to 52c; Edinburg 61 to 57; Welasco, 54 to 49.

Big Lake's rate was increased from 97c to $1, because it "is not meeting requirements for teaching of fire prevention in schools." Other increases included Bishop 67 to 70; Somerville 60 to 62; Teague 51 to 56.

MANY INJURED AS TROLLEY CAR RUNS WILD IN GOTHAM

By Associated Press.

New York, Aug. 1.—Seventy persons, many of them women were thrown to the floor and 25 of them were injured so as to require medical attention, when a trolley car ran wild on a downgrade and crashed into the rear of a halted car in Brooklyn today.

Vernon Man Was Electrocuted Sunday

By Associated Press.

Bernon, Texas, Aug. 1.—Earle E. Crooks, 30, was electrocuted Sunday when a drill with which he was working on an electric generator touched a part carrying current.

The accident was in the Texas Electric and Ice Company plant.

PERSONAL

Misses Ellie Young, and Irene Henry, and Mr. and Mrs. J. D. McBee left Corsicana Monday for a trip to Colorado. The trip was made in the McBee car.

Mrs. George Stamps has returned from a visit to her mother in Fort Worth.

Mrs. L. I. Griffin and Mrs. George Mabry of Blooming Grove were in Corsicana Monday.

Mr. and Mrs. A. P. Smith, and Mr. and Mrs. Berry Banks of Dallas spent the week-end with their mother, Mrs. J. B. Banks.

Mr. and Mrs. Ernest Huff of Blooming Grove were in Corsicana Monday.

Mr. and Mrs. Sam Slay and Mr. and Mrs. Jim Taylor, all of Itasca, were here Sunday afternoon to attend the funeral of Miss Ella Mae McFadden.

"Corsicana Has It."

TWO GIRLS DROWN WHILE WADING IN LOUISIANA RIVER

By Associated Press.

Denham Springs, La., Aug. 1.—Gladys Tate, 14 and Lucille Benton 13, were drowned in Amite river here yesterday.

The two girls, with Eula Tate, sister of Gladys, were wading when they went too far in the current to return. They called for help. A Mr. May jumped into the water with his clothes on to rescue the girls.

The three grabbed him and it was with a great difficulty that he was making for a barge with the girls when his shirt, to which the two unfortunate girls were clinging, tore allowing them to go back into the river.

After he had taken the other girl to safety, Mr. May was unable to find the two girls who had fallen away from him. The bodies were recovered two hours later.

INDIANA STANDARD DECLARES REGULAR AND EXTRA DIVIDEND

By Associated Press

Chicago, Aug. 1.—The board of directors of the Standard Oil Company of Indiana today declared a cash dividend of 62 1-2 cents and an extra cash dividend of twenty five cents on each share of capital stock, both payable September 15 to stockholders of record of August 16.

BOARD OF PARDONS TURNS DOWN NEGRO'S CLEMENCY APPEAL

By Associated Press.

Austin, Texas, Aug. 1.—The Board of Pardons today recommended denial of the plea of Ed Josslin, Victoria negro under death sentence in a criminal assault convicted, for commutation of the sentence. His execution date now is set for August 22.

LONE SCOUT NEWS

Contributed by
FRANK DIXON

Contributed by Frank Dixon

In August, Scout Booth Mooney, of Decatur, Texas, will begin the publication of his tribe newspaper which is to be known as "The Chieftan." At first the issues will contain only four pages, 6x9 inches in size, but he hopes to receive enough support to justify him in enlarging the paper. He is also planning to publish a Region Nine Yearbook this fall. It would be very good for each of us to write him and pledge our support in these plans. What we need most in Region Nine is an official publication for the District.

The Council Chief Karl Read's semi-monthly news letter will have full details and the program for the Texhoma Rally. This rally bids fair to be the biggest thing of its kind ever held by the Lone Scouts. are cordially invited to come. There The rally will begin about 2 p. m. Saturday, August 27. All Scouts will be a big time; pows, games, athletics, scouting contests, music, speeches, etc. Roy W. MacDonald, Karl Read, W. D. Hoting, Harold Pruce, Booth Mooney, and many other noted Lone Scouts will be present.

Plans for a South Texas Conference are now under consideration. A tribe is to be formed at Houston in the near future.

The old Lone Scout Handbook has been discontinued. The six page folder, known as "The Lone Scout Program," will have to be used until new handbooks can be adopted and published by Long House.

"The Universal Boy" and "The Far Hill Scout" have been combined.

"Lone Indian" official organ of the Lone Indian Fraternity, will put out a feminine number soon.

"The Jayhawk News" was enlarged with its June issue.

Cotton Time

is almost here. With it comes the season in which one should have new, clean sanitary and comfortable mattresses made. When thinking of this you want to think of the factory that has been continuously in that business for years. There's a reason. We are dependable. We are experts. Prices in line with quality work. We give you back what you want, expect and should have. Where FIRST COST IS LAST COST. Finished products of the present age, to satisfy, must be made with equipment for that purpose. Our work and goods speak for themselves. Mattresses and bedding is our speciality. Quality and service our guarantee.

HOWARD CRUMLEY IS HONORED BY HIS CO-WORKERS FRIDAY

GUEST OF HONOR AT DINNER AT NAVARRO HOTEL ON EVE OF DEPARTURE

Howard W. Crumley, one of the organizers of the Crumley-Ellis Company, Corsicana agents for the Chevrolet automobiles, and a member of that firm since its inception, has sold his interest in the business and is leaving Monday for New York where he will sail August 9 for an extended trip abroad, and his former associates in the firm, as well as the entire force, both clerical, sales and mechanical, honored him Friday night with with a handsome traveling bag as at the same time presented him a dinner at the Navarro Hotel and a remembrance of the pleasant associations in the Crumley-Ellis Company.

The entire force of the E. W. Ellis Company, formerly the Crumley-Ellis Company, were present and joined in the festivities of the occasion, which were also tinged with sadness due to Mr. Crumley's severing his connection with the business. Francis B. McKie was toastmaster for the occasion and handled that position with his characteristic ease and kept everything moving along smoothly and aided materially in making the occasion, a most pleasant one for the members and employees of the firm and a few others who were invited guests also.

During the course of the evening Mr. Crumley was made the recipient of a most pleasing surprise in the nature of a very handsome English Kit Bag, one of the best traveling bags obtainable in this section of the country. This was the gift of all those who had been associated with him in any way in the firm, coming from his associates in the office as well as in the mechanical and sales departments.

The presentation on behalf of the employees of the firm was made by Fred Gilliam in a most appropriate talk, and Mr. Crumley accepted the gift in the spirit in which it was made, speaking feelingly of his associations with all those who were present and who had so handsomely remembered him, and also expressing his regret at leaving the firm.

Talks were also made during the course of the evening by Beverley Caldwell, who is the oldest employee of the firm, in point of service in the office department; Leon Haste, oldest employee as to service in the service department; J. D. Horn of Ennis, Fred Krause of Dallas, J. C. McNeely of Dallas, M. J. Schmidt, Dallas, Wilbur Wright, Miss Grace Moore and E. W. Ellis.

Out of town guests for this most pleasing occasion were J. H. Horn, father-in-law of Mr. Crumley and former vice president of the Crumley-Ellis Co., of Ennis; Fred Krause, Chevrolet representative, of Dallas; M. J. Schmidt, zone dealer accountant of the Chevrolet Company, of Dallas; J. C. McNeely, in charge of car distribution of the Dallas zone for the Chevrolet Motor Company of Dallas.

As above stated, the affair was one of the most pleasant and enjoyable ever held in the Navarro Hotel banquet hall.

Mr. Crumley will leave Corsicana Monday for New York, where he will sail on August 9 for Europe. He will make a tour of Ireland, Scotland, England, Belgium, Germany, Switzerland, Italy and France. He will reach Paris in time for the American Legion convention which will be in session in Paris from September 18 to 24. Mr. Crumley will sail on the steamship President Harding and expects to be absent about two and one-half months.

He will return to Corsicana upon his return to the United States, but his future plans have not as yet been announced.

BAD PAINS IN SIDE

Spells of Nervousness Also Troubled This Lady Who Gives Cardui Credit for Helping Her Get Well.

Depew, Okla.—"For six years," says Mrs. Edd Burton, of this place, "I suffered as bad as a woman can suffer and still keep going."

"I was good for nothing, was lifeless and pale, unable to eat anything. Nothing agreed with me. At times I had such bad pains in my sides and back I would have to go to bed. I had cramping spells and would faint if I stood on my feet any length of time. My nerves would become upset at the least little thing and I would have spells of crying that were so exhausting they left me prostrate.

"Several of my friends suggested that I take Cardui. They told me of their experiences with it, how much they have been helped. At last I decided to try it.

"In a few weeks, I could see that I was improving, so I kept on. I did not expect the troubles of years to disappear in a few days, nor did they, but in time I was much better. I kept up the Cardui treatment for several months and thanks to it I am a well woman now."

President of Reorganized Firm

EARL W. ELLIS.

REORGANIZATION OF LOCAL CHEVROLET DEALERS ANNOUNCED

H. W. CRUMLEY RETIRES FROM FIRM AND OTHERS PURCHASE INTERESTS

The reorganization of the local agency for the Chevrolet automobiles was announced officially Saturday morning by E. W. Ellis, who was a member of the firm of Crumley-Ellis Company, and is now president of the E. W. Ellis Company, agents for the Chevrolet in this territory, and conducting a general service business, as well as used car sales business.

The reorganization was brought about through the retirement from the firm of Howard W. Crumley, who has sold his interests in the firm to F. B. McKie. The officers of the new firm are E. W. Ellis, president, Mrs. Katherine Kirven McKie, vice president, and F. B. McKie, secretary-treasurer. Mr. Ellis will be actively in charge of the business of the concern.

Announcement was also made that E. W. Ellis Company had leased the Davidson building, adjoining their place of business on West Fifth avenue on the east and will install therein a thoroughly up-to-date mechanical department, enlarging the facilities of that department which has been conducted in the rear of their present home. Fred Grundy of the Chevrolet engineering department, has been here for the past week superintending the installation of a model Chevrolet service layout and great pride is taken in this department by the firm.

In view of the increased floor space released in their main building through the leasing of the Davidson building adjoining and the installation of the service department therein, the used car show room which has been maintained by this firm at 105 South Beaton street, adjoining the Vogue Cafe on the south, will be discontinued on August 1st, but the used car display and salesroom of East Fifth avenue of this concern will be continued as heretofore.

The charter for the reorganized concern was granted by the State some time ago and the new firm is now in full control of the business. Mr. Crumley, as stated elsewhere in these columns, will make an extensive tour of Europe before deciding what business he will enter upon his return.

All parties connected with the new firm, especially Messrs. Ellis and McKie, are well known and competent business men and the same degree of success is predicted for the new firm that has attended the efforts of the old firm in their line of business.

JERUSALEM CITY OF ANCIENT TIMES CLAIMS CORSICANAN

The following interesting account of scenes met in Jerusalem and the surrounding area was written by Louis Wolens, who, with his father and mother, Mr. and Mrs. K. Wolens, is making a tour of many interesting points in the Old World:

Jerusalem is the capitol and largest city of Palestine and has a population of between 80,000 and 100,000 people, depending on what side of the hill you happen to be counting from. It is under English supervision for the next two years as an aftermath of the late world war. After this period the problem will still be far from solved as the Arabic and Jewish populace are continuously contesting dominance. The Jewish population of Palestine numbers over 50,000, though it is discouraging to know that few Jewish officials are numbered among those who have charge of governmental affairs. Jerusalem is one of the most cosmopolitan cities of the world being inhabited by every race and religious denomination. It seems that all sects are eager to gain a foothold on this land which plays an impotrant role in most every religion. It looms up to the very skies as it appears scattered over the well known seven hills which are oft referred to in both New and Old Testaments.

Streets Are Narrow

The main streets of the city or narrow winding roads, are roughly paved with brick or stone, and are merely a continuation of one hill to another. The streets are not named, neither are the houses numbered and one finds his way about by referring to the neighborhood and owner of the house. For instance: Ruchanan House of Ancona would be the house of Mr. Ancona in the neighborhood of Ruchanan, which may consist of a dozen short streets. Though this appears to be a very hazardous means of finding your way about you always succeed in locating your party. In fact, Jerusalem has all the ear marks of a city of 10,000 inhabitants and you can walk from place to place without any great discomfort especially after you become accustomed to the uphill pulling.

There is no wonder that there is something elevating about Jerusalem. In Cairo and Alexandria most of the garys or carriages are drawn by one horse but due to the hills of Jerusalem all garys are pulled by two horses.

Palestine uses the same system of money as Egypt, pounds and piasters. I believe this system of large money is partially the cause of the poverty of the country. Everything is reckoned in terms of pounds, which is equivalent to five dollars. Your hotel is a pound a day, the auto four pounds a day, and before you know it a hundred dollars is gone, while on the other hand labor is paid in piasters, or the equivalent of five cents. Menial labor is as cheap as three and four piasters a day, farm labor ten to fifteen piasters a day, and expert mechanics and masons range from thirty to forty. There are no set prices in Palestine, it is whatever you can buy it for. I rode in garys for three piasters and on occasions I had the driver follow me into the hotel after I gave him five piasters, cursing perhaps and almost making a scene, but you soon get so that you ignore their request for more. Never give them a coin expecting any change for in most cases you will never get it. I merely showed them a coin and held on until the change was forthcoming and when they intimated that they had no change I let them follow me down the street until I got the desired amount.

Ancient Walls.

Jerusalem is still surrounded in parts by the ancient walls which were built to with-stand the attack of the enemies. Many sections of these walls are destroyed and some still remaining of huge blocks of concrete are cracked with the age and appear moldy from standing. Eleven gates surround the city, seven of which are open, and they say that the others will be opened by the Messiahs and Prophets of the various sects.

Arabic and Hebrew are the languages of Palestine, but English is understood by many. The people are very learned in languages, and many of the people speak six or seven languages. In fact if you can't speak six languages you are not allowed on certain streets. They have a proclivity for languages and seem to center all their learning on mastering to speak in other tongues even the donkey understand in our languages, and every one knows how dumb a donkey is supposed to be.

Over the Hills to Jericho via the Dead Sea

Having spent a couple of hours on the Mount of Olives and Mount Scopua, we now began our downward march to the Dead Sea. Our path wound around the mountains of Moab and the Hills of Judea, the battling grounds of the early tribes of Israel. These mountains and endless chains of hills were void of any cultivation, and a few droves of sheep cared by a languishing native shepherd spotted the otherwise neglected mountains. Occasionally a small garden or patch of fodder can be noticed on some semi-fertile spot projecting from the hill sides.

About twelve miles out of Jerusalem the auto road began to go downward until we reached the sea level. Then the atmosphere became heavy and sultry until we reached the Dead Sea, 1350 feet below sea level where the heat was almost unbearable. We stopped our cars at the only hut which was the sole sign of life about the Dead Sea. This hut was occupied by a group of natives (Arabs) who sold drinks to the few tourists who took time to satisfy their thirst in their anxiety to get away from the terrible heat. However, I had heard much about the Dead Sea and was not satisfied with merely gazing upon the placid waters nor with the information that this body of water derived its named from the fact that the water was so salty that no animal or vegetable life could exist in it.

While the rest of the crowd were sheltering themselves from the torrid sun, I sneaked down to the beach and behind a couple of old sacks suspended on a pole I hurriedly discarded my clothes for the trunks part of a bathing suit and without further ado jumped into the water and struck out for a small sail boat anchored about one hundred yards from the shore. About half way out I wanted to rest and on attempting to tread and let my legs dangle beneath me I found I could not get my legs out of their horizontal position. Then I recalled sayings that it was impossible to sink in the Dead Sea. I felt content with this assurance of safety, and convinced myself of this by relaxing myself, but I floated around just like a cork. I could not even force my entire body under the water it was so heavy with mineral matter. I could have stayed in the water the entire day as it was the most pleasant and novel experience I have ever had in water. However, I disregarded instructions and got some of the acid like water in my eyes. It seemed that they were about to be burned out, and they continued to burn very painfully long after I had gotten out of the water.

As I crawled on the bank I was met by one of the Arabs who carried a bucket of what he called sweet water. I realized why he brought the water when I noticed that the acid water of the sea clung to my body and formed a salt like cake all over my body, and only by pouring the sweet water over my body could I get the salt off; even after I dressed I could brush particles of salt off any part of my body just by merely scraping; and it was several days and after a dozen washing before I could get the salt out of my hair.

Saw River Jordan.

We next drove along the calm and filthy waters of the river Jordan which Joshua had made famous years ago when he crossed the river with two and a half tribes. When you noticed the narrow stream you wondered why so much has been said about this memorable passage. We reached the site of New Jericho which is nothing more than an Arab hamlet of several hundred inhabitants who live in mud and primitive stucco huts. This new site is a couple of miles from old Jericho which tradition insists was cursed by the Gods and the few rulers who had the nerve to rebuild or attempt to rebuild met with death, and for this reason as the tale goes Old Jericho is nothing but the site and there are practically no evidence of it ever having been inhabited.

A short distance away can be seen a monastery now in the possession of the Greeks. It is located on the Hills of Temptation which got its significance from Christ's residence there. On the other side of Old Jericho and just beneath it is Elijah's fountain which has now been enclosed to form a neat, square pool. This is the body of water that Elijah of Biblical fame was passing with his followers and all were suffering from heat and from want of water and they reached a natural spring and found that the water was salty and unfit to drink.

The fountain is still there to prove this legendary bit of history. The spring furnished sufficient water to irrigate about one hundred red acres of desert soil, and it is almost a miracle to note this green fertile spot in the midst of a desert.

PROPER HOUSING IS IMPORTANT FACTOR RAISING OF SWINE

Special to the Sun.

College Station, Texas, July 29.—Proper housing is an important factor in the successful raising of hogs. E. R. Eudaly, swine husbandman, Extension Service, said in a discussion on "Hog Lot Equipment and Sanitation," before the livestock group of the Farmers' Short Course, A. & M. College of Texas.

"In a great many cases where houses are provided, they are not constructed in a manner that will permit the best results, Mr. Eudaly said. "This is especially true in regard to the farrowing house. In the majority of cases the farrowing house is too small. This does not permit the sow to approach the bed as she wants to and hence the pigs are often killed.

"Some farmers do not provide a pig guard rail in the farrowing house and the majority that do make such provision place the rail six inches from the floor and six inches from the wall. This is too close. When placed six inches from the floor or the ground the bedding very often comes within an inch or two of the guard rail and as a result the pig does not have enough room to go under the guard rail. Since a young pig is unable to jump the guard rail, it often gets mashed in the bed or against the rail. The guard rail should be at least twelve inches from the floor and twelve inches from the wall.

LOCAL CONGRESSMAN DELIVERED ADDRESS AT PRAIRIE POINT

Special to the Sun.

Kerens, Texas, July 29.—At the Prairie Point picnic, an annual occasion, held Friday at Prairie Point Congressman Luther Johnson, who is now spending a few weeks at his home in Corsicana, addressed the many people who had gathered there from all parts of Navarro and adjacent counties for this event, in one of the most interesting talks heard in this section in a long time. Local people who heard Mr. Johnson said that he had not lost his power of wholesome influence, and that every time they heard one of his good talks they declared him just a little better than before.

CARD OF THANKS

We wish to express our heart felt thanks to our friends for their flowers and kind sympathy extended us in our recent sorrow.

Mr. and Mrs. R. Mattinely, Mr. and Mrs. V. R. Mattingly, Douglas and Margaret Mattinely, Mr. and Mrs. C. W. Byrd.

Dr. T. M. Scott, Sr., of the Scott-White Sanitarium of Temple was in Corsicana Friday afternoon visiting friends. He visited the new Corsicana Hospital and clinic while in Corsicana.

Announcement to Public

In the rapid and substantial growth of our business we are again expanding in order that we may give better and more efficient service to the owners of Chevrolet Automobiles.

In spreading out we want to acquaint all owners of Chevrolet cars, and the public in general with our plans for the future.

Enlarges Mechanical Department

We have moved our mechanical department in the Davidson building adjoining our home quarters to the east, which separates this department from our display rooms.

This arrangement gives more room for the display of our new Chevrolet cars, and more room for our mechanics to give better and more efficient work.

We have installed in our mechanical department many new items of modern equipment for better service.

Each mechanic has his individual work bench completely equipped with modern tools and machinery with which to work.

Our Mechanics are Experts

Each one of our mechanics is an expert in his line, being graduates of the Chevrolet Mechanical Service School and serving under a diploma from this school. This means that Chevrolet owners will get the best attention to his car troubles at all times.

Two New Wash Racks

Included in our expansion we have installed two new wash racks with capable and experienced men to wash your cars.

Used Car Department

We have moved our display room of used cars from S. Beaton to our used car headquarters at 204 to 210 East 5th Ave., where we handle all used cars.

Well Equipped for Better Service

With expanded display rooms for our new cars and complete equipment for the enlarged and individual mechanical dept. together with separate used car dept. being complete, we are in better position than ever to give the best of sales and service.

We will be glad to have you come to see us at any time.

POULTRY RAISERS URGED GIVE CARE TO THEIR PULLETS

SUCCESS OF POULTRY RAISING DEPENDS LARGELY ON SELECTION OF PULLETS

Special to the Sun.

College Station, Texas, Aug. 1.—"Since the poultryman's future business depends upon his pullets, he should take a great pride in their growth and development," W. C. Homeyer, professor of poultry husbandry, John Tarleton College, Stephenville, said in a discussion of preparing pullets for the laying house given before the poultry group at the Farmers' Short Course, A. & M. College of Texas.

"The success of any poultryman depends largely upon the proper preparation of the pullets for the laying house. Far too many people neglect the growing stock until the birds are ready for the laying house, and then they expect to find a feed that will make the small, weak and immature pullets lay eggs of good size, and plenty of them. A pullet that has been neglected during its growing period will lay less eggs, will be more susceptible to disease, will lay for much shorter period, and the eggs from such stock will as a rule, produce weak chicks.

"The secret of success in feeding growing pullets is to never feed a forcing ration. Give them a chance to grow and mature well before forcing egg production. A pullet that starts laying early in the season usually goes into a moult in the fall of the year, and consequently produces less eggs during that period that they are worth most. Furthermore, a pullet that starts laying before it is well matured cannot stand the strain of high egg production and when used as a breeder will produce weak chicks.

"In order to mature pullets that will make real laying hens, be sure that you do not neglect the following points:

(1) Separate the sexes and have all of the pullets in one house, grouping the pullets according to size. (2) Place them in a house with plenty of room, fresh air, roosts, feed hoppers, and water fountains. (3) Give them a range that is shady and provided with an abundance of succulent green feed. (4) Keep houses, yards, and birds sanitary and free from insects. (5). Be sure that the pullets get a properly balanced growing ration at all times, which includes green feed, mineral, and water, as well as grain and mash.

"Well prepared pullets mean strong healthy birds, and a good profit. Through preparedness, you are better able to compete with your fellow poultrymen regardless of feed and egg prices."

FIGS ARE GROWN SUCESSFULLY IN CITY AND COUNTY

Indicating what can be done in the County in the way of growing figs, W. L. Bailey, well known farmer of the Angus community, brought some splendid specimen of the Magnolia species to the Chamber of Commerce Saturday morning.

Mr. Bailey has grown figs for a number of years and has one tree that is more than fifty years old. He has had some production difficulties but is a strong believer in the farm orchard.

B. H. Frick, of Corsicana, has also had satisfactory experience in growing figs in a small way here. Other Corsicana citizens have had satisfactory experience with limited number of trees.

Kansas Wheat High In Protein Content

Topeka, Kansas.—A few grains of the 125 million or more bushels of wheat now being harvested in Kansas will enter nearly every loaf of bread to be baked in the United States during the next year.

Kansas wheat, because of its high protein content, is demanded by millers in all parts of the country for mixing with flour made from the softer wheat grown in other climes.

The Sunflower state enjoys a climatic advantage that is conductive to production of wheat with a high percentage of protein. South of Kansas the growing season is too warm to give this advantage, while north of Kansas the winters are so short that spring wheat, containing less protein than winter wheat, alone can be raised. The "winter wheat belt" is thus situated principally between the southern and northern borders of Kansas, which are 200 miles apart. It extends eastward so as to include more than two-thirds of the state, which is 400 miles long from east to west borders.

FARMERS SHORT COURSE ATTENDED BY OVER 4,000

More than 4000 people were in attendance for the best annual Farmers' Short Course ever held in the history of A. & M. College, according to Henry Gentry, County Agent, who returned home Saturday morning.

Navarro County was represented by twelve men and four girls, including the County Agent and Miss Elma Lawmon, Home Demonstration Agent. More than a thousand farmers and members of their families went in their automobiles and camped on the campus during the course. Several counties had more than a hundred farmers in attendance.

Mr. Gentry said the Navarro County group enjoyed themselves very much. A special train of fourteen coaches, starting with six hundred passengers, passed through Corsicana, Saturday morning on the return home.

BOND BUYERS SUE LIMESTONE COUNTY CONTRACT BREACH

Mexia, Texas, Aug. 1. Employment of counsel for Limestone county in the suit brought by Sidlo, Simons, Day and Company, of Denver, bond buyers, against the county in connection with the R. R. DeWill delinquent tax contract, cancelled by the county, was discussed by county commissioners at Groesbeck Saturday. The case is in Federal court at Waco and discussion of fees with attorneys proposed for the case held up final action.

The firm of Sleeper, Boynton and Kendale, Waco, was suggested for employment by the county at a fee of $1,000 but agreement on appeal fees were to be made before final action, which is scheduled for Tuesday at 10 a. m.

Both sides of the case agree that the United States Supreme court must act on the case before final settlement is made. The county cancelled the contract claiming it was "unconscionable" after $28,0000 in warrants has been issued against anticipated fees of the contract. The owners of the bonds brought suit asking a court order to prevent cancellation.

HIGHWAY OFFICIALS GIVE ASSURANCE OF BETTER ROAD WORK

DIVISION ENGINEER AND SUPERINTENDENT VISITED CORSICANA SATURDAY

Assurances of increased activities in maintenance of highways in Navarro County were given Saturday by E. C. Woodward of Waco, division engineer of the Texas Highway Department.

Mr. Woodard was accompanied by E. A. Jordan, division superintendent, and O. R. Ford, who has recently moved to Corsicana to assume the duties of County Maintenance Foreman for Navarro County. The highway representatives conferred with County Judge Warren Hicks, the Commissioners Court and the Chamber of Commerce while in the city.

The Division Engineer explained that bridge timbers had been ordered for trestle work over the Trinity bottom east of Kerens and delivery was expected in the next ten days. Work of throwing up this river crossing has been under way for some days but has been handicapped somewhat by the lack of heavy equipment. The Engineer expressed appreciation for the fine cooperation given this project by County Commissioner Guynes, who of his precinct equipment for the has rented to the Department some work. County Commissioner Jack Megaritty also came in for the thanks of the Highway officials for cooperation he has assured them for road improvement plans in his precinct.

Requisition is being made for one thousand yards of gravel to be used in resurfacing rough spots on the highway north to Ennis.

County Foreman Ford expects to put a painter on the job in the county next week to begin putting official highway designation markers on all the principal routes.

Navarro County is considered to have some of the most difficult maintenance problems of any county in the State but Mr. Woodward explained that every effort would be made to put the roads in better shape before the winter rains set in. Considerable work on the county highways is at present under way. Mr. Woodard also explained that the policy in this county would be to use local teams on maintenance work.

Announcing

Absolute knowledge have I none,
But my aunt's washerwoman's son
Heard a policeman on his beat
Say to a laborer on the street
That he had a letter just last week
Hand written in the finest Greek
From a Chinese coolie in Timbuctoo
Who said that a son in Cuba knew
Of a colored gent in a Texas town
Who got it right from a circus clown
That a man in Klondike says he knows
From a gang of unwashed Eskimos
About some feller in Borneo
Who knew a man who claimed to know
A hermit who lived beside a lake
Whose mother-in-law will undertake
To prove a friend's sister's niece
Has stated in a nicely written piece
That she has a son who knows about
The date the new Ford car comes out.
